

Section 3 Review

The differences between perfect competition and monopolistic competition arise because

- (a) in perfect competition the prices are set by the government.
- (b) in perfect competition the buyer is free to buy from any seller he or she chooses.
- (c) in monopolistic competition there are fewer sellers and more buyers.
- (d) in monopolistic competition competitive firms sell goods that are similar enough to be substituted for one another.

An oligopoly is

- (a) an agreement among firms to charge one price for the same good.
- (b) a formal organization of producers that agree to coordinate price and output.
- (c) a way to attract customers without lowering price.
- (d) a market structure in which a few large firms dominate a market.
