The book perspective is highly interdisciplinary featuring models belonging to all relevant areas including machine learning robotics neural networks and computational modeling in psychology and neuroscience The book chapters review the authors most recent contributions to the investigation of hierarchical behavior and highlight the open questions and most promising research directions As the contributing authors are among the pioneers carrying out fundamental work on this topic the book covers the most important and topical issues in the field from a computationally informed theoretically oriented perspective. The book will be of benefit to academic and industrial researchers and graduate students in related disciplines The Logical Thinking Process H. William Dettmer, 2007-05-24 A major rewrite of Dettmer's classic Goldratt's Theory of Constraints this new edition presents a whole new approach to building and applying logic trees The logical thinking process referred to in the title is nothing less than a broadly applicable systems level approach to policy analysis Dettmer has streamlined the process of constructing the logic trees while simultaneously ensuring that the results are more logically sound and closer representations of reality than ever before He explains an easier more logically sound way to integrate Current Reality Trees with Evaporating Clouds His new version of the thinking process retires the Transition Tree in favor of the marriage of a more detailed Prerequisite Tree and critical chain project management This book contains new examples of logic trees from a variety of real world applications Most of the diagrams and illustrations are new and improved Explanations and procedures for constructing the logic trees are considerably simplified Energy Efficiency Analysis and Intelligent Optimization of Process Industry Zhiqiang Geng, Xiang Zhang, Yongming Han, Xingxing Zhang, 2023-10-09 **Modernizing the Workforce Investment Act** (WIA) of 1998 to Help Workers and Employers Meet the Changing Demands of a Global Market United States.
