Secure Software Design Theodor Richardson, Charles N. Thies, 2013 *Networking Security Privacy Is Hard and Seven Other Myths* Jaap-Henk Hoepman, 2023-10-03 An expert on computer privacy and security shows how we can build privacy into the design of systems from the start We are tethered to our devices all day every day leaving data trails of our searches posts clicks and communications Meanwhile governments and businesses collect our data and use it to monitor us without our knowledge So we have resigned ourselves to the belief that privacy is hard choosing to believe that websites do not share our information for example and declaring that we have nothing to hide anyway In this informative and illuminating book a computer privacy and security expert argues that privacy is not that hard if we build it into the design of systems from the start Along the way Jaap Henk Hoepman debunks eight persistent myths surrounding computer privacy The website that claims it doesn't collect personal data for example Hoepman explains that most data is personal capturing location preferences and other information You don't have anything to hide There's nothing wrong with wanting to keep personal information even if it's not incriminating or embarrassing private Hoepman shows that just as technology can be used to invade our privacy it can be used to protect it when we apply privacy by design Hoepman suggests technical fixes discussing pseudonyms leaky design encryption metadata and the benefits of keeping your data local on your own device only and outlines privacy design strategies that system designers can apply now
