 N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and
 beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When
 students curtail their course taking in mathematics they may be impacting their college and career options Thus high school
 mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also
 designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics
 educators have recognized that mathematics teachers not only need to know mathematics content and mathematics
 pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for
 teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied
 mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for
 teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It
 integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed
 to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach

 strategy is designed to help you develop a mathematics learning community and build a professional network that will be a
 valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich
 mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms
 Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered
 lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the
 lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed
