*Positive Development* Janis Birkeland, 2012-05-16 Janis Birkeland presents the innovative new paradigm of Positive Development in which the built environment provides greater life quality health amenity and safety for all without sacrificing resources or money With a different form of design development itself can become a sustainability solution A cornerstone of this new paradigm is the eco retrofitting of the vast urban fabric we already inhabit The author presents a revolutionary new tool called SmartMode to achieve this end This book challenges everyone working in or studying the areas of sustainable development planning architecture or the built environment to rethink their current ideas and practices

**Bioclimatic Housing** Richard Hyde, 2012-04-27 In the search for sustainable architecture there is growing interest in the relationship between nature and design In this vital new book the term bioclimatic relating to the dynamic between climate and living organisms is applied by the authors in focusing on countries where housing requires cooling for a significant part of the year In this context Bioclimatic Housing covers creative vernacular architecture to present both the theory and practice of innovative low energy architecture The book interweaves the themes of social progress technological fixes and industry transformation within a discussion of global and country trends climate types solutions and technologies Prepared under the auspices of a 5 year International Energy Agency IEA project and with case studies from Iran Malaysia Australia Japan Sri Lanka and Italy this is a truly international and authoritative work providing an essential primer for building designers builders developers and advanced students in architecture and engineering

**Design for Sustainability** Janis Birkeland, 2012-05-04 With radical and innovative design solutions everyone could be living in buildings and settlements that are more like gardens than cargo containers and that purify air and water generate energy treat sewage and produce food at lower cost Birkeland introduces systems design thinking that cuts across academic and professional boundaries and the divide between social and physical sciences to move towards a transdisciplinary approach to environmental and social problem solving This sourcebook is useful for teaching as each topic within the field of environmental management and social change has pairs of short readings providing diverse perspectives to compare contrast and debate Design for Sustainability presents examples of integrated systems design based on ecological

principles and concepts and drawn from the foremost designers in the fields of industrial design materials housing design urban planning and transport landscape and permaculture and energy and resource management **Building Ecology** Peter Graham, 2009-02-12 Buildings consume 40% of our planet's materials and 30% of its energy Their construction uses up to three million tonnes of raw materials a year and generates 20% of the solid waste stream If we want to survive our urban future there is no option but to build in ways which improve the health of ecosystems Understanding the concept of ecological sustainability and translating it into practice as sustainable development is a key challenge for today's built environment professionals The skill and vision of those who shape our cities and homes is vital to achieving sustainable solutions to the many environmental economic and social problems we face on a local national and global scale Peter Graham offers here a holistic view of ecologically sustainable building by drawing on established areas of knowledge demonstrating their relevance to the environmentally conscious building professional and putting the process product and impact of building into context Case studies illustrate how sustainable principles have been applied successfully and discussion topics are offered to stimulate thought Building Ecology will help planners surveyors designers and builders to incorporate sustainability into their everyday practice by showing which styles of building are ecologically sustainable providing fundamental knowledge for making decisions using the principles of ecologically sustainable building explaining a complex subject in a clear balanced way Building Ecology sets out the current scientific view of how nature works and how buildings link with and affect nature It provides fundamental knowledge for building in harmony with nature and keeping Earth's life supporting ecosystems healthy **The Environmental Brief** Richard Hyde, Steve Watson, York St John Business School Steve Watson, Wendy Cheshire, Mark Thomson, 2007-01-24 The built environment is responsible for an estimated forty five per cent of all greenhouse gas emissions As the greatest opportunities for reducing these emissions occur during the briefing and design processes the pathway to better design lies in preparing environmental briefs and using these to drive building design and produce buildings of high environmental performance This process driven book looks at the theoretical issues involved in an environmental brief and outlines methods by which architects can approach the writing of a brief that considers all aspects of the natural and the built environment and relates these concepts to a number of case studies from around the world **Re[al]d**, 2003-12 The inaugural student Yearbook for 2003/04 showcases the culture and work of students and staff of the faculty Explores how students and staff coexist within the Red Centre and how their creativity and culture challenges the building **Sustainable Buildings in Practice** George Baird, 2010-01-29 Current assessment methods of sustainable buildings do not adequately account for the users needs Given that over the life of a building total salary costs far outweigh both operating costs and combined capital and rental costs the occupants needs are not something which should be sensibly ignored This book presents an unbiased evaluation of thirty of the most cutting edge sustainable buildings in the world in terms of the users perceived comfort health and productivity The author has visited the buildings interviewed the design

teams and examined the findings of a sixty question standardized user questionnaire The book provides thirty case studies covering mixed mode passive and environmentally sustainable commercial and institutional buildings detailed insights into the principles underlying the design of sustainable buildings worldwide over several climatic zones and eleven countries together with clear explanations and illustrations of innovative design practice a discussion of common issues and the lessons that may be learnt from a study of the performance of sustainable buildings in practice from the point of view of the people who use them This important book will be of great benefit to architects and engineers facility managers of commercial and institutional buildings as well as developers and researchers academics and students in these fields      *Organic Indoor Air Pollutants* Tunga Salthammer,Erik Uhde,2009-11-18 With the quality of indoor air ranking highly in our lives this second completely revised edition now includes 12 completely new chapters addressing both chemical and analytical aspects of organic pollutants Sources of indoor air pollutants measurement and detection as well as evaluation are covered filling the gap in the literature caused by this topical subject This book is divided into four clearly defined parts measuring organic indoor pollutants investigation concepts and quality guidelines field studies and emission studies The authors cover physico chemical fundamentals of organic pollutants relevant definitions and terminology emission sources sampling techniques and instrumentation exposure assessment as well as methods for control Test methods and studies for various indoor environments are described such as automobile interiors museum environments or rooms with air ventilation Emission sources covered include household and consumer products as well as electronic devices and office equipment The book is aimed at chemists physicists biologists and medical doctors at universities and research facilities in industry and environmental laboratories as well as regulative bodies      **Circularity of Cementitious Materials** Christian Paglia,2025-08-18 Recycling of materials in building and infrastructure applications are global concerns driven by natural resource preservation needs of modernized countries and sustainable development of emerging countries This practical book explores the strategies necessary for successful recycling of cement based materials to achieve sustainable and long service life It investigates recycled cementitious materials to ensure decisive implementation and meet industry and societal challenges Presents the state of the art in recycling one of the most used materials in today s construction sector Covers construction and demolition waste and recycled concrete UHPC and road base material Aimed at readers in materials civil and construction engineering this book offers guidance to professionals and researchers developing strategies for sustainable application of cement based materials      Building Information Modelling (BIM) in Design, Construction and Operations II A. Galiano-Garrigos,L. Mahdjoubi,C.A. Brebbia,2017-08-09 The papers presented at Building Information Modelling 2017 BIM are from a range of forums including plenary papers workshops seminars and panel sessions The conference was attended by experts from industry practice and academia sharing their work on key topics the development of innovative solutions and the identification future trends The volume gives details of how BIM tools and techniques have fundamentally altered the
