

A high-angle, blurred photograph of a crowd of people walking on a light-colored, tiled floor. The motion blur creates a sense of a busy, crowded environment. The people are seen from above, with their legs and feet in various positions, suggesting movement in different directions. The colors are muted, with a lot of greys and whites from the floor and clothing, and some darker tones from the people's clothing.

Twenty years since the publication of the Second Edition and more than thirty years since the publication of the original book Racial Formation in the United States now arrives with each chapter radically revised and rewritten by authors Michael Omi and Howard Winant but the overall purpose and vision of this classic remains the same Omi and Winant provide an account of how concepts of race are created and transformed how they become the focus of political conflict and how they come to shape and permeate both identities and institutions The steady journey of the U S toward a majority nonwhite population the ongoing evisceration of the political legacy of the early post World War II civil rights movement the initiation of the war on
