purpose of the book is to create a foundation for the development of stochastic models and their analysis in manufacturing system operations. Given the handbook nature of the volume introducing basic principles, concepts, and algorithms for treating these problems and their solutions is the main intent of this handbook. Readers unfamiliar with these research areas will be able to find a research foundation for studying these problems and systems.

**Smart Sustainability** Madhusmita Mohanty, Rakesh Kumar, Rajeev Kumar Panda, Rashmi Ranjan Mallick, Kushal Walia, 2025-09-05. This book emphasizes the contribution artificial intelligence (AI) can make to sustainable innovation and business intelligence. It highlights the evolution of smart sustainability and business intelligence practice through AI. AI significantly adds efficiency to sustainable business intelligence practices. This book supports a sustainable development agenda. The book is useful for policymakers, corporate leaders, researchers, industry professionals, and other stakeholders engaged in sustainable business practices. This book examines the different applications of AI; it can revolutionize green supply chain management, inventory management, and logistics management. Emerging trends are examined along with problems and their fixes. Practitioners, companies, legislators, and researchers are provided with an implementation framework. In addition, ethical and environmental issues are covered with a focus on sustainable and responsible behavior. To shed light on the efficacy of AI applications, the book offers sustainable start-up businesses, real-world examples of its use. It also provides guidance on how to strategically incorporate AI into current frameworks for sustainable business practices. For professionals in business technology and sustainability, the book also helps with strategic planning. Professionals in waste reduction and resource management might also benefit from their insights. The book helps investors, entrepreneurs, and legislators make well-informed decisions. It increases public understanding of how augmented reality and virtual reality can support sustainable behaviors. The book promotes knowledge progress and sustainable practices across multiple industries by providing interdisciplinary viewpoints and acting as a bridge between theory and practice.

Servitization in Industry Gunter Lay, 2014-06-13. This book summarizes the interim result of the servitization activities in manufacturing industries. While the early literature on servitization tended to stress only its advantages, more recently, scholars have also started to refer to the challenges associated with servitization. This book attempts to give a balanced picture of servitization. The book is structured in four parts. Part I introduces the topic by presenting the most recent academic discussion about servitization and uses an empirical analysis to show the degree of servitization across Europe. The results of this analysis are then compared to the discussion in the literature. This comparison highlights the existing discrepancies between the rather euphoric literature and the more skeptical practical experience. The second and third parts attempt to explain these discrepancies by taking as a starting point

the assumption that servitization recommendations have to consider the heterogeneity of the manufacturing sector and the capabilities of the provider Part II presents articles which analyze the specific characteristics of different sectors with their barriers and potentials and presents frameworks for a successful servitization of the core sectors in European manufacturing industries which include e g aeronautics automotive ICT chemical industries pulp and paper industries and different engineering sectors Part III focuses on companies capabilities which are necessary for successful servitization These include strategic management marketing organization innovation engineering human resources controlling quality and networks All the contributions in parts II and III add up to a detailed picture of servitization for sectors and functions and indicate the practical implications for enterprises in manufacturing industries The fourth part concludes the book with a chapter summarizing the findings and giving an outlook of servitization in manufacturing industries its challenges and future developments *Signal* ,2009
