Irish problem The kingdom was federal before the Acts of Union in 1707 and 1801 According to the author the Act of Union which established the United Kingdom of Great Britain and Ireland was an attempt to devise a unitary state for the British Isles in which those islands were ruled directly from Westminster in London and the inhabitants of Ireland were British This failed dismally and was resisted by federalists in Ireland throughout the 19th and 20th centuries There is no simple solution to the British Irish problem and half measures of the Good Friday and St Andrews agreements at Stormont will fail The coalition at Stormont of loyalists and Republicans is a constitutional obscenity Gillespie says You are urged therefore to read this book in full to gain a valuable insight into the complexities of the nuts and bolts of this historic problem and find in the National Government of Ireland Act an approach that can be built in bricks and mortar in Ireland if the will of compromise among politicians and the people can be found to do it *Marines*, 1998 **Latino Education** Pedro Pedraza, Melissa Rivera, 2006-04-21 This volume represents the work of the National Latino a Education Research Agenda Project NLERAP It conceptualizes and illustrates the theoretical framework for the NLERAP agenda and its projects *Cost Accounting Theory, Typical Problems with Full Solution , Practical Problems in Cost and Management Accounting* Dr. B. **Gain-based Remedies for Breach of Contract** Daniel Zatorski, 2023-02-15 This book focuses on an emerging problem in English contract law what should be done when a party has been unjustly enriched as the result of a breach of contract but there is no measurable loss suffered by said party Two rulings are at the heart of the book *Wrotham Park Estate v Parkside Homes* and *Attorney General v Blake* These two cases can be said to have established gain based remedies in English contract law However the principles that underpin these remedies are not entirely clear and are subject to debate This book analyses these principles through the lens of compensatory and restitutionary approaches Moreover it applies a comparative analysis of these approaches through the lens of the civil law jurisdiction in Poland Since the term compensation is not a universal concept the book distinguishes between two rationales in the compensatory analysis The first reparative compensation is defined as a form of monetary recompense for loss or damage actually suffered The second substitutive compensation represents a monetary equivalent to a right that a person has been deprived of or denied Both rationales require the application of a broad notion of loss in order to make gain based remedies workable in both English and Polish law In contrast restitution states that a person cannot be permitted to profit from their own wrongdoing Based on this

principle the book argues that gain based remedies could be applied under Polish law through the rules of unjust enrichment. However in order to do so a broader understanding of the subtraction prerequisite the enrichment being at the aggrieved party's expense would have to be adopted. The book concludes that unjust enrichment is a more natural way of implementing gain based remedies in civil law jurisdictions.

*The Bureaucratic Labor Market* Thomas A. DiPrete, 2013-11-11

A description of the jobs in a labor force, an occupational description of it is an abstraction for describing the flow of concrete work that goes through one or more employing organizations; the flow of work probably changes at a higher speed than the system for abstracting a description of its occupations and jobs. A career system is an abstraction for describing the flow of workers through a system of occupations or jobs and thus is doubly removed from the flow of work. The federal civil service however ties many of the incentives and much of the authority to the flow of work through the abstractions of its career system and still more of them through its system of job descriptions. The same dependence of the connection between reward and performance on abstractions about jobs and careers characterizes most white collar work in large organizations. The system of abstractions from the flow of work of the federal civil service described here by Thomas A. DiPrete is an institution, a set of valued social practices created in a long and complex historical process. The system is widely imitated especially in American state and local governments but also in the white collar parts of many large private corporations and nonprofit organizations and to some degree by governments abroad. DiPrete has done us a great service in studying the historical origins of this system of abstractions especially of the career abstractions.
