

The following pages are intended to help in dealing with common roadside emergencies and breakdowns. You will find more detailed fault finding information at the back of the manual, and repair information in the main chapters.

## If your car won't start and the starter motor doesn't turn

- ☐ If it's a model with automatic transmission, make sure the selector is in the P or N position.
- ☐ Open the bonnet and make sure that the battery terminals are clean and tight (unclip the battery cover for access).
- ☐ Switch on the headlights and try to start the engine. If the headlights go very dim when you're trying to start, the battery is probably flat. Get out of trouble by jump starting (see next page) using another car.

**A** Check the condition and security of the battery connections.

**B** Unclip the plastic cover from the centre of the bulkhead and check that the engine management system wiring connectors are all securely joined

Check that electrical connections are secure (with the ignition switched off) and spray them with a water dispersant spray like WD-40 if you suspect a problem due to damp.

## If your car won't start even though the starter motor turns as normal

- ☐ Is there fuel in the tank?
- ☐ Has the engine immobiliser been deactivated? This should happen automatically, on inserting the ignition key. However, if a replacement key has been obtained (other than from a Volvo dealer), it may not contain the transponder chip necessary to deactivate the system.
- ☐ Is there moisture on electrical components under the bonnet? Switch off the ignition, then wipe off any obvious dampness with a dry cloth. Spray a water-repellent aerosol product (WD-40 or equivalent) on ignition and fuel system electrical connectors like those shown in the photos. Pay special attention to the ignition coils wiring connector.

**C1** If possible, remove the engine cover to ...

**C2** ... check that the ignition coil wiring connectors are securely connected ...

**C3** ... and the HT leads (non-GDI engines) are securely connected to both the coils and spark plugs
