Freight Transportation United States. Government Accountability Office,2008 Economic Impacts of Intelligent Transportation Systems E Bekiaris,Y J Nakanishi,2004-07-24 There are unique complexities associated with the economic valuation of Intelligent Transportation Systems ITS and telematics Traditional methods of quantitative analysis may not be appropriate in accurately and reliably assessing the economic impacts of these technologies Although advanced transportation and related technologies are being planned and deployed at an increasingly rapid pace many of the technologies are still relatively new and their use may not be widespread Much of the initial information and statistics gathered have been anecdotal and have focused more on benefits rather than costs Therefore difficulties arise due to the lack of historical data and lessons learned from which to draw upon In addition compared with traditional transportation infrastructure ITS technologies have different life cycles cost structures and a number of interrelated elements This book addresses these concerns and proposes new economic assessment techniques as well as modifications to existing ones Included are case studies from a multitude of North American European and Asian nations and major metropolitan areas covering a wide range of ITS technologies including freeway management electronic toll collection advanced driver assistance systems and traveller information systems Disaster Risk Reduction in Mexico Diana Sánchez-Partida,José-Luis Martínez-Flores,Santiago-Omar Caballero-Morales,Patricia Cano-Olivos,2021-04-13 This book recognizes Mexico s effects and challenges in a natural disaster and offers empirical risk reduction methods in critical cases The proposals considered here include real and detailed analysis a set of models frameworks strategies and findings in the three stages of the disaster before during after This book describes the methodology to find secure locations for the Regional Humanitarian Response Depot offers recommendations for the sites and creation of an Export Logistics Cluster shows how to use available technology and information to locate volunteers in the right spots describes mathematical models to help to allocate

procedure of resources for restoring the affected community and proposes actions to create resilience in the country's main economic sectors including agriculture and industry. The processes applied at recent disasters such as the 1995 earthquake and their results are used as case studies identifying possibilities for further improvement. The book also describes new trends for Mexico due to climate change and makes suggestions for mitigating future disasters. The proposals are also replicable to other highly populated societies with similar socio-economic structures. Finally, this book is the basis for generating more innovative recommendations by researchers, graduate students, academics, professionals, and practitioners to obtain better planning and better collaboration between all the humanitarian chain actors. This book intends to be of interest as a fundamental tool for decision makers, governments, non-governmental organizations, and enterprises.
