management Our aim is to stimulate breakthrough research streams linking learning unlearning and knowledge management How can organizations tailor use and extend techniques and tools from knowledge management for improving their business practices and processes Building upon existing work on knowledge management KM and organizational learning the conference will promote interdisciplinary approaches from computer science and information systems business management and organization science as well as cognitive science Emphasis will be put on systematic learning from experience KM tools and KM success factors A special interest belongs to knowledge management initiatives which are lightweight i e do not place considerable additional burden on users and KM experts allow an incremental adoption i e do not require large up front investment before any return of investment is at least visible and are flexible regarding frequent changes in experts and topics Continuing the success of the ECKM conference series since 2000 the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge intensive organizations **Assessment for Learning** Rita
