The Report: Oman 2014 Oxford Business Group, 2014-01-15 The sultanate s economy continues to enjoy the benefits of petroleum wealth which has provided budget surpluses in most years and served as a backbone for growth However planning is well under way for an era in which oil will not be the main economic driver with the twin goals of diversification and creating an increased number of private sector jobs at the top of the government s current agenda Indeed in recent years the non OPEC oil exporter s economy has been undergoing a steady transformation reorienting from oil toward a more diverse set of service and industry based economic activities So far progress has been promising In 2011 oil and gas accounted for 38.8% of GDP With the continuation of higher than expected energy prices in 2012 the government has increased economic investments accordingly These investments which include infrastructure social programmes and small business development are aimed toward better preparing the country for its post fossil fuel future
