A Scientific Bibliography of the Drakensberg, Maloti and Adjacent Lowlands Rodney Moffett, 2021-04-19 This bibliography includes scientific articles on the Drakensberg Maloti and Adjacent Lowlands published between 1808 and 2019. Although focussing on material appearing in accredited journals, there is such a wealth of information in the form of unpublished yet traceable reports, documents, presentations and dissertations, these are also included. The bibliography has two parts: a complete list arranged alphabetically and the same references arranged in 33 different disciplines. These range from Palaeobotany with 17 entries to Rock Art with 502 entries.

Coastal Risk: Shores and Deltas in Peril Clara Armaroli, Derek W. T. Jackson, Denise Reed, Christophe Viavattene, 2020-01-30 The interaction between land and sea is controlled by a number of processes that are in general driven by the equilibrium between environmental forcing components e.g. hydrodynamic waves, currents, surges, atmospheric e.g. winds and terrestrial e.g. catchment land cover and sediment dynamics. In the context of the Anthropocene epoch, the equilibrium in many coastal regions is now often altered by the influence of human activities. Successive human activities globally influence indirectly these forcing components, helping magnify the negative impact of extreme meteorological events and sea level rise. Directly, human activity can also influence a number of processes at a local scale within and between the catchment, the sea and the coast. For example, misplaced engineered infrastructure inside these naturally dynamic environments can accentuate disequilibrium, destabilizing shores and deltas. Development in catchments can promote rapid runoff, inducing sometimes dramatic effects on downstream urbanized areas, the socio-economy as well as on coastal resources and ecosystems. This Research Topic aims to assemble research and review papers that focus on the dynamics of shores and deltas in peril under present conditions as well as in the future context of sea level rise, climate change and adaptation strategies under various scenarios.
