Strategies and Priorities for Information Technology at the Centers for Medicare and Medicaid Services National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on Future Information Architectures, Processes, and Strategies for the Centers for Medicare and Medicaid Services,2012-02-23

The Centers for Medicare and Medicaid Services CMS is the agency in the Department of Health and Human Services responsible for providing health coverage for seniors and people with disabilities for limited income individuals and families and for children totaling almost 100 million beneficiaries The agency s core mission was established more than four decades ago with a mandate to focus on the prompt payment of claims which now total more than 1 2 billion annually With CMS s mission expanding from its original focus on prompt claims payment come new requirements for the agency s information technology IT systems

Strategies and Priorities for Information Technology at the Centers for Medicare and Medicaid Services reviews CMS plans for its IT capabilities in light of these challenges and to make recommendations to CMS on how its business processes practices and information systems can best be developed to meet today s and tomorrow s demands The report s recommendations and conclusions offered cluster around the following themes

- 1 the need for a comprehensive strategic technology plan
- 2 the application of an appropriate metamethodology to guide an iterative incremental and phased transition of business and information systems
- 3 the criticality of IT to high level strategic planning and its implications for CMS s internal organization and culture and
- 4 the increasing importance of data and analytical efforts to stakeholders inside and outside CMS

Given the complexity of CMS s IT systems there will be no simple solution Although external contractors and advisory organizations will play important roles CMS needs to assert well informed technical and strategic leadership The report argues that the only way for CMS to succeed in these efforts is for the agency with its stakeholders and Congress to recognize resolutely that action must be taken to begin the needed cultural and organizational transformations and to develop the appropriate internal expertise to lead the initiative with a comprehensive incremental iterative and integrated approach that effectively and strategically integrates business requirements and IT capabilities
