

PHYSICAL SECURITY MANUAL

INTRODUCTION.

There is no doubt that every facility, including industrial and military complexes, is exposed at all times to risks and unforeseen situations, which is why it is essential to adopt security measures for the benefit of the personnel, the facility itself and the material that it contains and is protected, for which those who have the protection mission must familiarize themselves with the basic principles of physical security. The main methods and techniques concerning security, personnel control, disaster planning and instruction and training of personnel assigned to the task to be accomplished.

THE SECURITY OFFICER.

The security officer is a person who performs a specific job for a period of time whose obligation is to look after goods and properties located in the area demarcated for surveillance in order to prevent damage, theft, robbery, fire or destruction. Therefore, you must have full knowledge of your job, in addition to developing the ability to handle any abnormal situation that may arise and know where and how to get help if you need it.

At all times while providing service, we must be alert and always watch for conditions that could result in injury to employees, or damage to property and equipment.

Almost always, the OVP is the first contact a visitor has with the company.

The way you greet visitors and answer their questions will affect the way they perceive your company and the attitude they adopt toward it. Human relations and relations between employees depend to a large extent on the attitude of the OVP.

DEFINITION OF PHYSICAL SECURITY.

By physical security we understand all the preventive measures adopted to protect public or private facilities that, by their nature, are considered vital. Among the most important we can mention electric power plants, drinking water tanks or dams, refineries, aqueducts and oil depots, railway stations and tracks, roads, bridges, tunnels, airports, warehouses, public buildings, hotels, residences of important people, embassies, etc.
