The Mammoth Of Air Disasters And Near Misses:

The Mammoth Book of Air Disasters and Near Misses Paul Simpson, 2014-10-16 An incredible 30 000 flights at least arrive safely at their destinations every day But a handful don t while some come terrifyingly close to crashing When even the smallest thing does go wrong at 35 000 feet the result is nearly always a fast unfolding tragedy. This extensive collection of compelling real life accounts of air disasters and near disasters provides a sobering alternative history of the just over 105 years that passengers have been travelling by air from the very earliest fatality to recent calamities But there are incredible stories of heroism against the odds too such as that of Captain Chesley Sullenberger who successfully landed his aircraft with both engines gone on the Hudson River in New York saving the lives of everyone aboard and of the American Airlines crew who prevented terrorist Richard Reid from exploding a bomb hidden in his shoe three months after 9 11 The book also details the often ingenious always painstaking work done by air accident investigators while a glossary helps to clarify the occasional inevitable bits of jargon The Just Culture Principles in Aviation Law Francesca Pellegrino, 2019-09-09 This book reviews and critically analyzes the current legal framework with regard to a more just culture for the aviation sector This new culture is intended to protect front line operators in particular controllers and pilots from legal action except in the case of willful misconduct or gross negligence by creating suitable laws regulations and standards In this regard it is essential to have an environment in which all incidents are reported moving away from fears of criminalization The approach taken until now has been to seek out human errors and identify the individuals responsible This punitive approach does not solve the problem because frequently the system itself is also at fault Introducing the framework of a just culture could ensure balanced accountability for both individuals and complex organizations responsible for improving safety Both aviation safety and justice administration would benefit from this carefully established equilibrium **Disaster Victim Identification in the 21st Century** John A. Voices From the Napoleonic Wars Jon E. Lewis, 2015-04-09 Voices from the Napoleonic Wars reveals in telling detail the harsh lives of soldiers at the turn of the eighteenth century and in the early years of the nineteenth the poor food and brutal discipline they endured along with the forced marches and bloody hand to hand combat Contemporaries were mesmerised by Napoleon and with good reason in 1812 he had an unprecedented million men and more under arms His new model army of volunteers and conscripts at epic battles such as Austerlitz Salamanca Borodino Jena and of course Waterloo marked the beginning of modern warfare the road to the Sommes and Stalingrad The citizen in arms of Napoleon's Grande Arm e and other armies of the time gave rise to a distinct body of soldiers personal memoirs The personal accounts that Jon E Lewis has selected from these memoirs as well as from letters and diaries include those of Rifleman Harris fighting in the

Peninsular Wars and Captain Alexander Cavalie Mercer of the Royal Horse Artillery at Waterloo They cover the land campaigns of the French Revolutionary Wars 1739 1802 the Napoleonic Wars 1803 1815 and the War of 1812 1812 1815 in North America This was the age of cavalry charges of horse drawn artillery of muskets and hand to hand combat with sabres and bayonets It was an era in which inspirational leadership and patriotic common cause counted for much at close quarters on chaotic and bloody battlefields. The men who wrote these accounts were directly involved in the sweeping campaigns and climactic battles that set Europe and America alight at the turn of the eighteenth century and in the years that followed Alongside recollections of the ferocity of hard fought battles are the equally telling details of the common soldier's daily life short rations forced marches in the searing heat of the Iberian summer and the bitter cold of the Russian winter debilitating illnesses and crippling wounds looting and the lash but also the compensations of hard won comradeship in the face of ever present death Collectively these personal accounts give us the most vivid picture of warfare 200 and more years ago in the evocative language of those who knew it at first hand the men and officers of the British French and American armies They let us know exactly what it was like to be an infantryman a cavalryman an artilleryman of the time **Normal Accidents** Charles Perrow, 2011-10-12 Normal Accidents analyzes the social side of technological risk Charles Perrow argues that the conventional engineering approach to ensuring safety building in more warnings and safeguards fails because systems complexity makes failures inevitable He asserts that typical precautions by adding to complexity may help create new categories of accidents At Chernobyl tests of a new safety system helped produce the meltdown and subsequent fire By recognizing two dimensions of risk complex versus linear interactions and tight versus loose coupling this book provides a powerful framework for analyzing risks and the organizations that insist we run them The first edition fulfilled one reviewer s prediction that it may mark the beginning of accident research In the new afterword to this edition Perrow reviews the extensive work on the major accidents of the last fifteen years including Bhopal Chernobyl and the Challenger disaster The new postscript probes what the author considers to be the quintessential Normal Accident of our time the Y2K computer problem **From Airbus to Zeppelin** Norman Ferguson, 2016-10-06 A must have A Z guide with fascinating facts figures quotes and statistics from the high flying world of aviation From Airbus to Zeppelin has it all D is for Desert Island Discs just what would Dambuster Guy Gibson have liked while marooned on his desert island E is for Everest did you know that two Scotsmen were the first to fly over the magnificent mountain F is for Faster than the sun which aircraft was the first to fly faster than the Earth's rotation A must read for anyone interested in the world of aviation and may win the reader a pub quiz The Serial Killer Files Paul Simpson, 2017-05-18 There are many myths about serial killers that they are all or two dysfunctional loners all white males only motivated by sex that they all travel and operate across a wide area cannot stop killing are all insane or evil geniuses and that they all want to get caught Of course there are some serial killers who fit into these categories but the married Green River Killer was not a dysfunctional loner there are plenty of female and non

Caucasian serial killers Dr Harold Shipman was certainly not motivated by sex many serial killings such as the Ipswich prostitute murders carried out by Steve Wright happen within a confined area the BTK Killer Dennis Rader stopped killing in 1991 but wasn t caught until fourteen years later Many serial killers may have a low animal cunning or be street smart but few of them are Mensa level geniuses Each of the thirty cases covered here is unusual in some respect perhaps in the way in which the killer carried out their crimes the choice of victims the way in which they were apprehended or the method of their execution The cases are presented alphabetically by country from Australia via Colombia Great Britain Indonesia Iran South Africa and elsewhere to the United States and then chronologically They come from across history and from all over the world The author has gone back as far as possible to contemporary source material newspaper accounts trial evidence interviews with perpetrators or survivors rather than rely on the increasingly blurred truth to be found online and in far too many collections Tales from the Vatican Vaults David V. Barrett, 2015-08-06 A captivating collection of original science fiction and fantasy stories based on the same alternate world premise a collection of documents that have been suppressed by the Vatican and hidden away for years in some cases centuries are revealed when the vaults are thrown open by a reforming pope In this alternate reality Pope John Paul I does not die a month after his accession in 1978 instead he lives on for over 30 years to become the most reforming pope of all time In addition to relaxing the rules on birth control and priestly celibacy he also opens up the most secret parts of the Vatican Library to scholars In the Vatican's deepest vaults documents are discovered which shed new light on world history containing information which if true would cause many parts of accepted history to have to be rewritten These include not just the undercover involvement of the Catholic Church in world affairs but documented accounts of what really happened in historical conundrums the real lives of saints and popes miracles magic angels and even alien encounters Coal-mine Accidents in the United States and Foreign Countries Clarence Hall, Dorsey Alfred Lyon, Harold Hayward Clark, Nelson Horatio Darton, Richard Bishop Moore, Karl Ludwig Kithil, Ralph W.
