All About Penguins

Penguins are one of winter's most popular animals. Many people know what penguins look like, but not a lot about their habitats and characteristics.

Penguins can be found in many different parts of the Southern hemisphere. Plenty of people imagine penguins as living in very cold areas such as Antarctica. However, they also live in warmer areas such as Australia and South Africa. Despite common misconceptions, you won't find any penguins living in the North Pole!

Penguins are flightless birds but can swim! In fact, they can stay under water for up to 20 minutes at a time. Penguins usually eat fish and other seawater animals such as squid and octopus. Not all penguins are the same, there are at least 17 different species of penguins and their habits differ based on where they live.
