Autoimmuno-Anti-Tumour Immunity (AATI) - Understanding the Immune Responses against "Self" & "Altered-self" Fang-Ping Huang, 2017-05-16 The brief description of tumours being wounds that do not heal by Dr Harold F Dworak nearly three decades ago N Engl J Med 1986 has provided not only a vivid illustration of neoplastic diseases in general but also in retrospect conceptually a plausible immunological definition of cancers Based on our current understanding in the field it could have even a multi dimensional meaning attached with This relates to several important issues which need to be addressed further i e in terms of a close link between chronic inflammation and tumourigenesis widely observed clinical and experimental evidence of immunity against tumours versus the highly immunosuppressive tumour microenvironment being associated and their underlying immunological mechanisms oncogenic basis as well as the true causal relationship in question Recent findings from studies into the pathogenesis of autoimmunity and more importantly the mechanisms which protect against it have offered some new insights for our understanding in this direction Chronic or persistent autoimmune like inflammatory conditions are evidently associated with tumor development

The important question is about their true causal relationship. Chronic or persistent inflammation has been shown to contribute directly to tumour development by triggering neoplastic transformation and production of inflammatory mediators which could promote cancer cell survival, proliferation and invasion. On the other hand, tumours are mutated self tissue cells to which the host immune system is largely tolerized otherwise. Although the mutations may give rise to the expression of tumour specific antigens (TSA) or tumour associated antigens (TAA), most of these TSAs/TAA's are found to be poor immunogens. The ongoing inflammatory conditions may therefore reflect a desperate attempt of the host immune system to mount anti tumour responses though ineffectively, being a consequence of the continuous yet largely futile triggering by those poorly immunogenic TSAs/TAA's. Furthermore, during autoimmune or overtly persistent immunological responses, many regulatory mechanisms are triggered in the host in attempts to limit the ongoing harmful inflammatory reactions. Such a negative feedback regulation is known to be crucial in preventing normal individuals from immune mediated diseases. As a result of the negative feedback loop, however, an excessive production of anti inflammatory or immunosuppressive molecules followed by the exhaustion of the immune effector cells may instead lower the ability of the host immune system to mount specific anti tumor responses, allowing the escape of tumour or mutated cells from immunosurveillance. This may also help to explain why the most effective way to enhance host immunity against cancer is by targeting the negative arm of immune regulation. In this Frontiers Research Topic, we aim to gather current views from experts in these inherent overlapping fields of oncology, autoimmunity and tumour immunology and to make them available to our potential readership who may be particularly interested in this cutting edge area. By understanding how the immune system is normally regulated, why dysregulation of which may cause the immunological/oncological related diseases, we also encourage further discussions as to how the so called self reactivity/autoimmune responses can be alternatively switched on and redirected immunologically or molecularly for effective cancer treatment.

Reducing Fuel Consumption and Greenhouse Gas Emissions of Medium- and Heavy-Duty Vehicles, Phase Two National Academies of Sciences, Engineering, and Medicine, Transportation Research Board, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Assessment of Technologies and Approaches for Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles, Phase Two, 2020-06-15. Medium and heavy duty trucks, motor coaches and transit buses collectively medium and heavy duty vehicles or MHDVs are used in every sector of the economy. The fuel consumption and greenhouse gas emissions of MHDVs have become a focus of legislative and regulatory action in the past few years. This study is a follow on to the National Research Council's 2010 report Technologies and Approaches to Reducing the Fuel Consumption of Medium and Heavy Duty Vehicles. That report provided a series of findings and recommendations on the development of regulations for reducing fuel consumption of MHDVs. On September 15, 2011, NHTSA and EPA finalized joint Phase I rules to establish a comprehensive Heavy Duty National Program to reduce greenhouse gas emissions and fuel consumption for on road medium and heavy duty

vehicles As NHTSA and EPA began working on a second round of standards the National Academies issued another report Reducing the Fuel Consumption and Greenhouse Gas Emissions of Medium and Heavy Duty Vehicles Phase Two First Report providing recommendations for the Phase II standards This third and final report focuses on a possible third phase of regulations to be promulgated by these agencies in the next decade **Malawi Youth Status Report ...** ,2016

Service Learning as Pedagogy in Early Childhood Education Kelly L. Heider, 2016-10-14 This book presents the most recent theory research and practice on service learning as it relates to early childhood education It describes several service learning programs many of which were developed to better prepare pre service teachers for the challenges they face in today's early childhood classrooms including class size ever changing technology diversity high stakes testing parental involvement or the lack thereof and shrinking budgets The book shares stories of positive outcomes from pre service teachers who having participated in service learning programs report a shift in their attitudes and beliefs including an increased empathy for others a heightened sensitivity to student differences more democratic values and a greater commitment to teaching In addition the book examines the effects of service learning and positive outcomes for children and teacher educators as well Schools today face an increasing number of language learners the mainstreaming of special population students and working with a standards driven curriculum All of these present new challenges for teachers as they attempt to meet their students educational needs As a result of this new classroom environment and the educational needs they present teacher educators must now seek different approaches to prepare prospective teachers to meet these needs because the traditional approaches to teacher preparation such as coursework independent of fieldwork are no longer effective in equipping teachers to address these issues This book examines in detail the new approach of service learning
