Quaternary Environmental Change in Southern Africa Jasper Knight, Stefan W. Grab, 2016-06-23 This book provides a benchmark study of southern African landscape evolution during the Quaternary for researchers professionals and policymakers

Towards applying a green infrastructure approach in the Gauteng City-Region Christina Culwick, Samkelisiwe Khanyile, Kerry Bobbins, Stuart Dunsmore, Anne Fitchett, Lerato Monama, Raishan Naidu, Gillian Sykes, Jennifer van den Bussche, Marco Vieira, 2019-12-11 In the context of heightened climate variability thinking about ways to redesign our urban areas with more sustainable infrastructure solutions is becoming more and more important Green infrastructure GI is emerging as an alternative approach to traditional grey infrastructure in urban planning and development Its emergence can be understood in terms of the growing demand for infrastructure and services increased concerns over natural resource constraints and climate change and the negative impacts associated with traditional approaches to designing and building cities It has been proposed that GI can provide the same services as traditional infrastructure at a similar capital cost while also providing a range of additional benefits However despite the increasing examples of successful urban GI applications traditional infrastructure continues to dominate due to the lack of systematic evidence to support GI implementation As a result there has been an increase in calls from policy and decision makers for a greater evidence base on the benefits of GI as well as for practical guidelines on its implementation Towards applying a green infrastructure approach in the Gauteng City Region is the GCRO s third report in its ongoing research into Green assets and infrastructure The first two reports in this project series were more theoretically grounded and policy oriented whereas this third report is more practical in nature The first report explored the basic principles around GI assessed the extent of ecological features in Gauteng and the way governments in the province think about planning and maintenance of green assets The second report responded to some of the challenges identified in the first report and in particular the importance of government officials and practitioners in exploring how international green infrastructure plans could be applied in the Gauteng context This third report builds on the findings of the aforementioned reports and the project s CityLab series which highlighted the need to build an evidence base as critical for garnering support for and as well as enhancing investment in the GI approach Unlike the more theoretically grounded earlier reports this report comprises four technical sections and practical reflections on how a GI approach could be incorporated into urban planning in the GCR and in other similar urban contexts

Kromdraai Jose Braga, 2017-03-30 This book is dedicated to the palaeontological site of Kromdraai one of the most well known sites of the Cradle of Humankind the famous UNESCO World Heritage site located in the Gauteng province South Africa From 1938 to 1943 Robert Broom described important hominin fossil discoveries from Kromdraai as belonging to a single individual and designated the type specimen as one of our distant relatives called *Paranthropus robustus*

Fault Lines Jonathan Jansen, Cyrill Walters, 2020-03-31 What is the link if any between race and

disease How did the term baster as mixed race come to be mistranslated from incest in the Hebrew Bible What are the roots of racial thinking in South African universities How does music fall on the ear of black and white listeners Are new developments in genetics simply a backdoor for the return of eugenics For the first time leading scholars in South Africa from different disciplines take on some of these difficult questions about race science and society in the aftermath of apartheid This book offers an important foundation for students pursuing a broader education than what a typical degree provides and a must read resource for every citizen concerned about the lingering effects of race and racism in South Africa and other parts of the world *A Fossil History of Southern African Land Mammals* D. Margaret Avery, 2019-04-11 A comprehensive reference on the taxonomy and distribution in time and space of all currently recognized southern African fossil mammals This title is also available as Open Access on Cambridge Core

Handbook of Pleistocene Archaeology of Africa Amanuel Beyin, David K. Wright, Jayne Wilkins, Deborah I. Olszewski, 2023-08-17 This handbook showcases an Africa wide compendium of Stone Age archaeological sites and methodological advances that have improved our understanding of hominin lifeways and biogeography in the continent The focal time spans the Pleistocene Epoch c 2.5 million 11 700 years ago during which important human traits such as obligate bipedalism that freed the hands to engage in creative activities a large brain relative to body size language and social complexity developed in the general forms that they are found today The handbook is the first of its kind and it is expected to play a significant role in human evolutionary research by Collating the African Stone Age record which exists in a fragmented state along the lines of national boundaries and colonial experiences Showcasing emerging conceptual and methodological advances in African Pleistocene archaeology Providing reference datasets for teaching and researching African prehistory Making Africa's Stone Age record accessible to researchers and students based in Africa who may not have access to journal publications where most new field discoveries are published The Handbook features 128 chapters of which 116 are site entries grouped by the host countries and presented in an alphabetical order A number of those site related entries examine multiple archaeological localities lumped under specific projects or study areas The rest of the contributions deal with methodological topics such as luminescence and radiocarbon dating field data recovery lithic analysis micromorphology and hominin fossil and zooarchaeological records of Pleistocene Africa The introductory chapter provides an historical overview of the development of Stone Age Paleolithic archaeology in Africa beginning in the mid 19th century and paleoenvironmental and chronological frameworks commonly used to structure the continent's Pleistocene record By making a good amount of African Stone Age literature accessible to researchers and the public we wish to promote interest in human evolutionary research in the continent and elsewhere Awarded the 2025 The Best Book Award by The Society of Africanist Archaeologists

The Oxford Handbook of the South African Economy Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021-11-18 While sharing some characteristics with other middle income countries South Africa is a country with a unique economic history and distinctive economic features It is a regional economic

powerhouse that plays a significant role not only in southern Africa and in the continent but also as a member of BRICS. However, there has been a lack of structural transformation and weak economic growth, and South Africa faces the profound triple challenges of poverty, inequality, and unemployment. Any meaningful debate about economic policies to address these challenges needs to be informed by a deep understanding of historical developments, robust empirical evidence, and rigorous analysis of South Africa's complex economic landscape. This volume seeks to provide a wide-ranging set of original, detailed, and state-of-the-art analytical perspectives that contribute to scientific knowledge as well as to well-informed and productive discourse on the South African economy. While concentrating on the more recent economic issues facing South Africa, the handbook also provides historical and political context. It offers an in-depth examination of strategic issues in the country's key economic sectors and brings together diverse analytical perspectives.

Research Handbook on Major Sporting Events Harry A. Solberg, Rasmus K. Storm, Kamilla Swart, 2024-01-18. Presenting a comprehensive and pragmatic view on challenges around sporting events, this timely Research Handbook examines the hosting of major sporting events and the impacts they can have on stakeholders. Looking beyond the host destination, it provides a wealth of conceptual analysis on the organisation and administration of such events, including the bidding process, planning, management, sponsorship issues, and marketing.

African Paleoeology and Human Evolution Sally C. Reynolds, René Boë, 2022-06-09. Humans evolved in the dynamic landscapes of Africa under conditions of pronounced climatic, geological, and environmental change during the past 7 million years. This book brings together detailed records of the paleontological and archaeological sites in Africa that provide the basic evidence for understanding the environments in which we evolved. Chapters cover specific sites with comprehensive accounts of their geology, paleontology, paleobotany, and their ecological significance for our evolution. Other chapters provide important regional syntheses of past ecological conditions. This book is unique in merging a broad geographic scope of all of Africa and a deep time framework of the past 7 million years in discussing the geological context and paleontological records of our evolution and that of organisms that evolved alongside our ancestors. It will offer important insights to anyone interested in human evolution, including researchers and graduate students in paleontology, archaeology, anthropology, and geology.

Naturalized Parrots of the World Stephen Pruett-Jones, 2021-08-10. The first book to look at naturalized parrots with a global perspective, with a wide range of chapters by 36 leading researchers.

Aflatoxin Lukman Abdulra'Uf, 2017-08-30. Aflatoxins are a group of highly toxic and carcinogenic substances which occur naturally and can be found in food substances. Aflatoxins are secondary metabolites of certain strains of the fungi *Aspergillus flavus* and *A. parasiticus*, and the less common *A. nomius*. Aflatoxins B₁, B₂, G₁, and G₂ are the most important members, which can be categorized into two groups according to their chemical structure. As a result of the adverse health effects of mycotoxins, their levels have been strictly regulated, especially in food and feed samples. Therefore, their accurate identification and determination remain a Herculean task due to their presence in complex food matrices. The great public concern and the strict legislation incited the development of

reliable specific selective and sensitive analytical methods for pesticide monitoring that are discussed in this book *Birth Advantages and Relative Age Effects: Exploring Organisational Structures in Youth Sport* Adam Leigh Kelly, Jean Côté, Jennifer Turnnidge, David Hancock, 2021-09-14 Hominin Postcranial Remains from Sterkfontein, South Africa, 1936-1995 Bernhard Zipfel, Brian G. Richmond, Carol V. Ward, 2020-05-07 The 1924 African discovery of an early hominin child's skull referred to as *Australopithecus africanus* by Raymond Dart was a major event in the history of paleoanthropology. This provided the first evidence of early hominins in Africa and overturned conventional ideas about human evolution. Subsequent discoveries of *A. africanus* fossils notably from cave deposits at Sterkfontein yielded the first evidence that early hominins were habitual bipeds. Fifty years after this, the discovered wealth of fossil evidence in eastern Africa of the slightly older and craniodentally more primitive taxon *A. afarensis* catalyzed debates about the origin and evolution of human gait and the phylogenetic relationships among early hominins. This formed the main basis of our understanding of early hominin bipedality and paleobiology. Little attention has been paid to the variation among species in postcranial anatomy and locomotion although intriguing hints are beginning to appear in the literature. Did multiple varieties of bipedality evolve? Did australopithecine species differ in positional or manipulative abilities, body proportions or patterns of sexual dimorphism? These are critical questions for understanding the evolution of australopithecines and hominin locomotion. In this book, Bernhard Zipfel, Brian Richmond, Carol Ward and the most knowledgeable scholars in their respective fields provide groundbreaking accounts for each postcranial fossil and expert examinations into the background of each fossil. The chapters include standardized high quality photographs and anatomical descriptions to allow readers to read the book entirely or learn by comparing features across chapters. *Hominin Postcranial Remains from Sterkfontein South Africa 1936-1995* is an evolutionary history of South African hominins and it offers readers an orientation and introduction to the field. This is an important reference book for professional paleontologists, paleobiologists, anthropologists, geologists, students and historians interested in human evolution. *The Paleobiology of Australopithecus* Kaye E. Reed, John G. Fleagle, Richard E. Leakey, 2013-03-15 *Australopithecus* species have been the topic of much debate in palaeoanthropology since Raymond Dart described the first species *Australopithecus africanus* in 1925. This volume synthesizes the geological and paleontological context of the species in East and South Africa, covers individual sites such as Dikika, Hadar, Sterkfontein and Malapa, debates the alpha taxonomy of some of the species and addresses questions regarding the movements of the species across the continent. Additional chapters discuss the genus in terms of sexual dimorphism, diet reconstruction using microwear and isotopic methodologies, postural and locomotor behavior and ontogeny. **Rough and Tumble** Travis Rayne Pickering, 2013-04-10 Travis Rayne Pickering argues that the advent of ambush hunting approximately two million years ago marked a milestone in human evolution, one that established the social dynamic that allowed our ancestors to expand their range and diet. He challenges the traditional link between aggression and human predation, however, claiming that while

aggressive attack is a perfectly efficient way for our chimpanzee cousins to kill prey it was a hopeless tactic for early human hunters who in comparison to their large potentially dangerous prey were small weak and slow footed Technology that evolved from wooden spears to stone tipped spears and ultimately to the bow and arrow increased the distance between predator and prey and facilitated an emotional detachment that allowed hunters to stalk and kill large game Based on studies of humans and of other primates as well as on fossil and archaeological evidence Rough and Tumble offers a new perspective on human evolution by decoupling ideas of aggression and predation to build a more realistic understanding of what it is to be human
