The Interburundian Negotiations A Long Walk Towards Peace:

Negotiating Peace Sven M. G. Koopmans, 2018-07-12 This book is the first and only practical guide to negotiating peace In this ground breaking book Sven Koopmans who is both a peace negotiator and a scholar discusses the practice politics and law of international mediation With both depth and a light touch he explores successful as well as failed attempts to settle the wars of the world building on decades of historical political and legal scholarship Who can mediate between warring parties How to build confidence between enemies Who should take part in negotiations How can a single diplomat manage the major powers What issues to discuss first what last When to set a deadline How to maintain confidentiality How to draft an agreement and what should be in it How to ensure implementation The book discusses the practical difficulties and dilemmas of negotiating agreements as well as existing solutions and possible future approaches It uses examples from around the world with an emphasis on the conflicts of the last twenty five years but also of the previous two and a half thousand Rather than looking only at either legal political or organizational issues Negotiating Peace discusses these interrelated dimensions in the way they are confronted in practice as an integral whole With one leading question what can be done

Grounding Leadership Ethics in African Diaspora and Election Rights Jean-Pierre Bongila, 2013-10-10 This book analyzes the leadership ethics dilemma of whether the diaspora ought to vote specifically in their homeland franchise This quagmire becomes even more complex in the case of Africa where some diasporas participate in their countries elections and others don't It implies and goes beyond the mere question of why or what are the reasons behind the fact that members of some countries vote and those of other nations do not The analysis contained in the book deals with whether it is right or wrong good or bad just or unjust virtuous or immoral desirable or undesirable for citizens living overseas to participate in their countries suffrages and for the leaders of African countries to extend the franchise rights to their diaspora Pedagogically the book proposes an applied methodology of leadership decision making based on ethical dilemmas which instructors and learners of various disciplines particularly those in leadership ethics as well as global leaders might find useful The combined DIRR Description Interpretation Rehearsal and Re discernment proposed by Enomoto Kramer 2007 and the prudent pragmatism by Bluhm Heineman 2007 correspond to the traditional African baobab tree as a physical space of social and political conflict resolutions In this book the baobab tree an ethical arena of public debates helps to weigh primarily the need for diaspora Africans to get the right to vote as well as the social political and economic benefits such a right if it were granted would entail for all the parties involved Drawing from the examples of countries that have championed some form of democratic processes including expatriate elections the book brings to the forefront the crucial role of both the leadership of Africa and that of their diaspora in spearheading the continent on the path of sustainable development

Security Privatization Oldrich Bures, Helena Carrapico, 2017-09-29 This book widens the current debate on security privatization by examining how and why an increasing number of private actors beyond private military and security companies PMSCs have come to perform various

security related functions While PMSCs provide security for profit most other private sector stakeholders make a profit by selling goods and services that were not originally connected with security in the traditional sense However due to the continuous introduction of new legal and technical regulations by public authorities many non security related private businesses now have to perform at least some security functions This volume offers new insights into security practices of non security related private businesses and their impact on security governance The contributions extend beyond the conceptual and theoretical arguments in the existing body of literature to offer a range of original case studies on the specific roles of non security related private companies of all sizes from all areas of business and from different geographic regions
