Hiskes,1998-10-08 This book presents a novel and compelling thesis about technological risk liberalism and policy making in liberal societies Opposed to most theories of risk that focus on individual decision makers and models or rational choice this book argues that risks must be seen as intrinsically both emergent and political phenomena As such risks resist reduction to individual actors events or decisions To fully understand and make policy for risk then it is necessary to recognize that risks call attention to the connections between individuals and events to the power being exercised in the determination and distribution of risks and to how the failure to see risks as political emergent phenomena results in policy failure as in instances of Not in My Backyard NIMBY controversies Liberal societies have particular difficulty in coping with risk due to the excessively individualistic political theory and epistemology that undergirds liberalism Thus seeing risks as emergent has dramatic impact on the fundamental political concepts that make up liberal political theory and operate within liberal societies The book treats especially the concepts of consent community authority rights responsibility identity and political participation The meaning of each of these ideas has been altered by modern technological risks and coping with risk will require that liberal societies redefine what these most basic concepts of political principles are to mean in political practice and policy making

This new collection of essays commissioned from a range of scholars across the world takes as its theme the reception of Rome's greatest poet in a time of profound cultural change. Amid the rise of Christianity the changing status of the city of Rome and the emergence of new governing classes Vergil remained a bedrock of Roman education and identity. This volume considers the different ways in which Vergil was read, understood and appropriated by poets, commentators, Church fathers, orators and historians. The introduction outlines the cultural and historical contexts. Twelve chapters dedicated to individual writers or genres and the contributors make use of a wide range of approaches from contemporary reception theory. An epilogue concludes the volume.

*For Love and Money: the Literary Art of the Harlequin Mills and Boon Romance* Laura Vivanco,2011-01-01

Laura Vivanco's study challenges the idea that Harlequin Mills Boon romances are merely mass-produced commodities churned out in accordance with a strict and unchanging formula. She argues that many are well-written, skilfully crafted works and that some are small masterpieces. *For Love and Money* demonstrates the variety that exists beneath the covers of Harlequin Mills Boon romances. They range from paranormal romances to novels resembling chick lit and many have addressed serious issues including the plight of post-Second World War refugees, threats to marine mammals and HIV/AIDS. The genre draws inspiration from Shakespearean comedies and Austen's novels as well as from other forms of popular culture. Laura Vivanco's *For Love and Money* is an impressive study of the popular fiction of Harlequin Mills and Boon that is a must-read for any student of popular fiction and for those who write and love the genre.

Liz Fielding, author of over 50 Harlequin Mills Boon romances. Deep learning, wide reading and clear thinking are very much in evidence in Vivanco's exploration of HM B. A welcome addition to popular romance criticism.

Professor Pamela Regis, author of *A Natural History of the Romance Novel*. Laura Vivanco's analysis of the category romance is both meticulous and inspiring. And while Vivanco limits her examples and discussions to category romances by Harlequin Mills Boon and the HQN imprint, her application of Frye's mimetic modes begs for expansion to texts and authors across the genre. This piece of literary criticism should serve as a template for romance scholars to move from defending the genre to discussing its values and complexity as a literary art.
