

How Does the Size of a Candle Affect How Long It's Going to Burn?

Procedure

1. Measure the diameter of the candle.

2. Light the candle.

3. Measure the time it takes to burn.

4. Repeat the experiment with candles of different sizes.

Predictions

I predict that the larger the candle, the longer it will burn.

Observations

The candle burned for approximately 1 hour and 15 minutes. The flame was steady and bright. The candle was completely melted at the end of the experiment.

Results

The results show that the larger the candle, the longer it burns. This is because a larger candle has more wax to burn.

Conclusion

The experiment proved that the size of a candle does affect how long it burns. The larger the candle, the longer it burns.

Improving Instruction in the Public Schools Through Title III of the NDEA Alfred Bruce Gaarder,1966

Lights Out at Northern Perry Munson,2010-08-11 The opening of the story vividly follows the author's relocation to Detroit Michigan from Seattle Washington Munson crosses the plains in his Volvo pulling his sailboat to his new home in Grosse Pointe Michigan He a teacher is moving there because his wife a pathologist has found a new job at Detroit Medical Center As he drives he reflects on the land he crosses and the experiences he had in school in rural South Dakota and how it shaped his outlook As he drives he has great doubts about moving to Michigan and questions his future there Yet he is on the road with no way to turn back Finally he arrives in Detroit entering the rustbelt city that looks like a new planet to him poverty stricken destroyed and hopeless The scene shifts to his experiences while moving in and getting settled and the adjustments he has to make to live in a large crime ridden Midwestern city After a discouraging job hunt he is suddenly employed by Detroit Public Schools as a chemistry teacher and enters the classroom The experience is so incredibly different than anything else that he has previously seen in education that he decides to start keeping a diary of relevant day to day activities Months lead to years and he describes the dynamics of teaching in an inner city school Corruption abysmal administrative incompetence and even great but not too numerous educational triumphs go down in print His journal is that of an observer from the outside looking in The diary becomes the stream of consciousness of a hard working dedicated teacher who is

tormented by what he sees and cannot change There are successes but the climb is constantly uphill due to administrative bungling a pathetic lack of supplies and low expectations placed on students by the system As the years go by the school is engifted with a huge grant from the Kellogg Foundation It is supposed to reform the school and result in a turn around that never happens Funds disappear not very much appears in the classrooms and nobody seems to notice any appreciable difference in the quality of education After all is spent there is only disillusionment and anger in the school over the project A new principal takes over and the school further declines into violence and chaos Yet through all of this Munson finds that education can and does take place in his classroom if he works hard with what he has available and does the best he can under the worsening circumstances In the end his main positive experience is the students themselves those who could be changed and enabled After thirteen years in Northern High School the environment becomes so violent dangerous and hopeless that Munson seriously contemplates transferring out to another school In this last year he describes a crumbling lawless school so vividly that you can smell the smoke from the fires and hear the screams of students beating and being beaten August 2004 finds Munson in Finney High School just a bit over a mile from his home He finds more of the same there but the commute is at least short He surprisingly teaches quite successfully there for three years and then on June 22 2007 he retires from thirty years of public school teaching On that very same day Northern High closes its doors due to lack of enrollment At the end of the day the lights were turned out

machine Youngsters will find plenty of hints for crafting eye catching displays too *Escape Plan* Lynette D. Charity,2025-07-30 Lynette Charity's grit, grief and gratitude will have readers rooting for this timeless memoir about growing up in the early 60s South and overcoming all the odds against her to become a doctor in a time when the idea of a Black woman physician was practically unheard of. At nine years old Lynette Charity looked on frozen in place as her father hit her mother so hard that she flipped over their front porch railing and fell into the hedges below. That night young Lynette hatched a plan she would escape this life no matter what it took. And a month later after watching the first episode of a new show called Ben Casey she decided that becoming a doctor was her way out. At some point Lynette noticed that all the real doctors and nurses who took care of her were Black and all the make believe doctors and nurses on TV were white. Did it make a difference? Not to her. Over the next decade plus she focused on her studies. At a time when segregation was still alive and well in Virginia she forged her mother's signature on transfer papers so she could go to a better resourced white school on the other side of town. Upon finishing high school she got a full ride to Pittsburgh's Chatham College. And after graduating Chatham with honors she became a member of Tufts University School of Medicine's Class of 1978, one of seven Black women in her class. Raw, candid and inspiring *Escape Plan* is the remarkable story of how through perseverance and single minded determination a Black girl from the 1960s South faced down adversity, exceeded everyone's expectations and fulfilled her dreams. Make: Maverick Scientist Forrest M. Mims,2024-02-14 *Maverick Scientist* is the memoir of Forrest Mims who forged a distinguished scientific career despite having no academic training in science. Named one of the 50 Best Brains in Science by *Discover* magazine, Forrest shares what sparked his childhood curiosity and relates a lifetime of improbable, dramatic and occasionally outright dangerous experiences in the world of science. At thirteen he invented a new method of rocket control. At seventeen he designed and built an analog computer that could translate Russian into English and that the Smithsonian collected as an example of an early hobby computer. While majoring in government at Texas A M University, Forrest created a hand held radar like device to help guide the blind. And during his military service he had to be given special clearance to do top secret laser research at the Air Force Weapons Lab. Why? Because while he lacked the required engineering degree, they wanted his outside the box thinking on the project. He went on to co found MITS Inc, producer of the first commercially successful personal computer, wrote a series of electronics books for Radio Shack that sold more than seven million copies and designed the music synthesizer circuit that became known as the infamous Atari Punk Console. All this came before he started consulting for NASA's Goddard Space Flight Center and NOAA's famous Mauna Loa Observatory and earning the prestigious Rolex Award. This intimate portrait of a self made scientist shares a revelatory look inside the scientific community and tells the story of a lifelong learner who stood by his convictions even when pressured by the establishment to get in line with conventional wisdom. With dozens of personal photos and illustrations, *Maverick Scientist* serves as proof that to be a scientist you simply need to do science. **Forces and Motion Science Fair Projects, Revised**
