Aim:

Investigate the transmission of light in different medium

- Transparent, Translucent and Opaque objects
- Different types of beams
- Reflection and refraction

Revision:

1. What is natural light and Artificial light.
2. What are the benefits of natural light compared to artificial light.
3. Problems associated with poor lighting.
4. Distinguish between type of artificial lights.

### ***What is light?***

Light is form of energy required to see to live comfortably and work efficiently.

#### **Natural lighting:**

The Sun produces natural light. This light source is only available between sunrise and sun set hours, when sun light is not available artificial light is required.

#### **Artificial Lighting:**

This is any light that is manmade, for example light from fires, candle and electrical lamps. Artificial light is costly in comparison to natural light, which is free of charge.

#### **Benefits of Natural compared to artificial light:**

Natural light is free of charge and this source of energy does not pollute the environment, in comparison to the Artificial light source. Artificial light is a utility that is costly, and the production of electricity is highly toxic to the environment, since it entails the burning of natural gas.

To maximise the use of natural light, buildings and houses must be constructed strategically to access Sun light. Therefore, the placement of
