5 Programming the Remote Control

IMPORTANT NOTES:

In this section, when you are instructed to press [DEVICE], it refers that means to select one of CBL, TV/TV, VCR, DVD or AUX device, depending on what device you are programming the remote to control.

There are three ways you can program your remote:

- Quick Set-Up Method
- The Pre-Programmed 3-Digit Code Method
- The Auto-Search Method

The Quick Set-Up Method is a unique feature that enables the fastest and easiest setup by using a 3-digit code. This is the easiest way to set up devices made by popular manufacturers.

The Pre-Programmed Code Method allows you to setup all of the features at once by entering 3-digit code numbers that correspond with the components you desire to control. Code tables for this method are on the backside of the operating instructions.

The Auto-Search Method scans through all of the codes in the remote control, one at a time, allowing you to identify the correct code.

IMPORTANT SETUP NOTE:

The automatic programming stops when you see a steady red LED light for 3 seconds. If you do not see a steady red LED light, the LED light will flash and you will need to start over.

A. Quick Set-Up Method

- STEP 1** Turn on the equipment you want to program. To program your TV, turn on the TV.
- STEP 2** Point the remote at the component and press and hold the [DEVICE] key for 4 seconds until the Device LED blinks off and turns back on. Continue holding the [DEVICE] key and press the number keys, one at a time, starting with 1, then 2, 3, 0. Stop pressing the number keys when the device turns off.
- STEP 3** Release the [DEVICE] key to reset the code. The Device LED will blink twice to confirm the code is stored.

Repeat the steps above for all components (CBL, TV, VCR, DVD, AUX).

B. Pre-Programmed 3-Digit Code Method

- STEP 1** Turn on the equipment that you want the remote control to operate (Cable Box, TV, VCR, DVD, etc.).
 - STEP 2** Press the [DEVICE] button and the [CODE] button simultaneously for three seconds. The corresponding device LED will turn on, indicating that it is ready to be programmed. The LED will remain on for 30 seconds. The next step must be entered while the LED is on.
 - STEP 3** Point the remote control toward the equipment and enter the three-digit code number assigned to your brand (see code table). If there are more than one three-digit number listed for your brand, try one code number at a time until your equipment turns off.
- NOTE:** You can only set one code number for each device. If you are programming the TV, DVD or VCR, the equipment will turn off. For CBL, you will see the LED blink twice. For AUX, you will see the LED blink twice. If the LED does not blink twice, the code number is not correct. Repeat the steps above for each device. If you are programming the TV, DVD or VCR, you will see the LED blink twice. If the LED does not blink twice, the code number is not correct. Repeat the steps above for each device.
- STEP 4** Store the three-digit code by pressing the same [DEVICE] button once again. The device LED will blink twice to confirm that the code has been stored.
