Taylor, John Davidson, 2015-05-07 Table of Contents Introduction Why People invest Chapter 1 The relation between Risk and Return Chapter 2 Most common types of investment Chapter 3 Diversification is for idiots or not Chapter 4 Value investing Chapter 5 Theory of portfolio optimization Conclusion Author bio Introduction Why people invest Investing simply means putting your money to work for you. The reason why people invest is pretty obvious: to get rich. Er, Arnold Schwarzenegger once said that money does not make people happy. According to what he said, he has over 50 million, but he is just as happy as he was when he had 48 million. Now that is easy to say when you have that much money, right? Most of the people that think that the rich are lucky. But that's wrong. Most of the rich people actually earned their money. They found what they are good at, they used their skills and qualities, and earned the money. Being rich does not mean that you are lucky. It means that you have found out how to use what you are good at to make money. *Investing 101* Matthew Barnes,2015-03 LOOKING FOR A SAFE AND SIMPLE INVESTING METHOD THAT DOESN T TAKE YEARS OF ACADEMIC MARKET STUDY Then You Will LOVE This Book The reason most people do not invest for

themselves is because they feel they cannot safely or effectively do it without an in depth knowledge of the market and everything in it This has not been my experience and this is what this book is about I spent years learning both fundamental and technical analysis of the markets I spent years following TV and internet gurus I spent years reading books and learning and testing out different investing and trading strategies from the unbelievably complicated to the unabashedly simple What I discovered over years of trial and error was three things First that I can do at least as good as the experts on TV and usually better Second that my money is safer with me controlling it than with anybody else And last that the simpler the approach the better the returns and the more enjoyable the process becomes In my experience you do not need to understand the inner workings of the market in order to make good returns You do not need to be able to evaluate the fundamentals of a company as well as Warren Buffett or be an expert at chart reading to make good money You don t even need to know most of the fancy terms out there like Bollinger Bands Fast Stochastics Slow Stochastics and RSI s In short you don t need to spend years academically studying the markets in order to make very good returns If you are looking for a guide to understanding a wide variety of market terminology and investing options as well as an academic study of the inner workings of the market this book is not for you Instead Investing 101 is a bare bones cut to the chase results oriented blueprint to making real money in the market It doesn t matter if you are a beginner or one of the many investing dummies Investing 101 teaches a basic and simple investing strategy that works without an in depth collegiate level understanding of the markets This book covers the few definitions and inner workings you do need to understand in order to stay safe and make the strategy work for you I will show you how to let the experts like Warren Buffett do the investing for you while you ride their success trains I will show you how to invest both conservatively and aggressively and I recommend you do both I have a website set up for you with training videos should you need them and I have a newsletter you can subscribe to if you want more help In short I offer many tools for you to use to do your own investing safely and effectively and without taking up hours of your free time In only minutes per week you CAN take charge of your own financial future
