Department**

Sba Guideline 2014 Measurements Memorandum:

Ukraine International Monetary Fund. European Dept.,2014-09-02 EXECUTIVE SUMMARY The first review discussions took place in a context of heightened geopolitical tensions and deepening economic crisis Intensification of the conflict in the East and escalation of the gas dispute with Gazprom two of the key risks identified at the time of the program request have materialized These developments have affected confidence balance of payment flows economic activity and budget execution The banking sector has had to cope with larger than anticipated deposit outflows and the exchange rate has depreciated more than expected at the time of the program request The authorities have implemented policies broadly as agreed but significant pressures have emerged All but one performance criteria for end May were met and all structural benchmarks have been implemented albeit some with a delay However the deterioration in the economic outlook fiscal and quasi fiscal pressures and heightened balance of payment difficulties are putting the initial program targets in jeopardy Two end July PCs are estimated to have been missed and the end 2014 targets are out of reach All continuous PCs were met Discussions focused on the appropriate policy response to these short term pressures and on reforms to support sustained growth There was agreement that the policy effort should focus on compensatory measures to meet key program objectives while allowing some temporary deviations from the initial targets In particular the NBU will limit the decline in reserves through market purchases the government will take additional fiscal measures to keep public finances sustainable and Naftogaz will strengthen current and past gas bills collection Discussions also focused on reforms aimed at modernizing the monetary policy framework preserving financial stability addressing governance issues and improving the business climate Nonetheless risks loom large The program hinges crucially on the assumption that the conflict will begin to subside in the coming months Should active fighting continue well beyond that the small buffers under the revised baseline would be quickly exhausted requiring a new strategy including additional external financing A further heightening of geopolitical tensions could also have significant economic consequences Domestically policymaking may become more difficult in case of early elections Strong policy performance and adherence to the planned reforms is therefore critical Staff supports the authorities request for completion of the first review and the waivers for nonobservance and applicability of performance criteria The purchase released upon completion of the review would be in the amount of SDR 0 914 billion of which SDR 0 650 billion will be used to finance the budget deficit

Republic of Kosovo International Monetary,International Monetary Fund. European Dept.,2023-06-07 After a strong recovery from the pandemic higher international commodity prices moderated GDP growth in 2022 which posted 3 5 percent while inflation exceeded 11 percent Lower commodity prices in 2023 will provide much needed relief to households and firms This together with supportive fiscal policy especially higher public investment absorption will underpin higher growth of about 4 percent and lower inflation which should slow to 5 6 percent Risks continue to be mainly on the downside higher commodity prices would lead to lower growth and higher

inflation and tighter financial conditions would weigh on bank asset quality and liquidity *Republic of Kosovo* International Monetary Fund. European Dept.,2016-01-25 This paper discusses Kosovo s First Review Under the Stand By Arrangement and Requests for Modification and Waivers of Applicability of Performance Criteria PC The program is on track All end August 2015 PCs and indicative targets were met by comfortable margins All structural benchmarks for the first review have been met More broadly there is strong ownership of structural reforms in the financial sector and in public procurement The authorities reaffirmed the targets for the fiscal deficit and bank balances for next year and identified measures to achieve these The IMF staff support the authorities request for completion of the first review **FCC Record** United States. Federal Communications Commission,2016

Republic of Serbia International Monetary Fund. European Dept.,2015-02-26 This 2014 Article IV Consultation highlights that the Serbian economy is facing serious challenges GDP contracted by an estimated 2 percent in 2014 on account of continued falling domestic demand aggravated by floods and weak economic activity in trading partners This together with the low imported inflation pushed Serbia s inflation rate below the National Bank of Serbia s inflation tolerance band allowing some easing of monetary policy To support their economic policies over 2015 17 the authorities have requested the IMF s assistance The program aims to restore public debt sustainability strengthen competitiveness and growth and boost financial sector resilience 2018 Review of Program Design and Conditionality International Monetary Fund. Strategy, Policy, & Review Department,2019-05-20 The 2018 Review of Program Design and Conditionality is the first comprehensive stocktaking of Fund lending operations since the global financial crisis The review assesses program performance between September 2011 and end 2017 Programs during this period were defined by the protracted structural challenges faced by members and hampered by the persistently weak global environment

Greece International Monetary Fund,2010-05-10 The Greek economy is teetering owing to heavy public debt and loss of market access Greece is adopting an ambitious comprehensive multiyear adjustment program to lower the fiscal deficit and the debt ratio reduce domestic demand in line with capacity and increase supply and competitiveness so that the economy can step onto a higher growth path led by investments and exports Greece needs a strong and sustained adjustment program to lower the fiscal deficit substantially and create the basis for a declining debt ratio *Federal Register* ,2014 **Georgia** International Monetary Fund,2012-04-24 This staff report considers Georgia s request for a Stand By Arrangement and an arrangement under the Standby Credit Facility Performance in 2011 has been stronger than originally envisaged with growth of nearly 7 percent inflation in the low single digits public debt falling to 34 percent of GDP and international reserves increasing to US 2 8 billion Exchange rate flexibility remains a critical instrument of adjustment in response to shocks At the same time high financial dollarization may require the central bank to intervene to avoid abrupt and potentially destabilizing exchange rate fluctuations **Seychelles** International Monetary Fund. African Dept.,2014-12-22 Program implementation and economic fundamentals continue to be strong but the external position weakened in mid 2014 Projected growth for 2014

has been revised down to 2.8 percent from 3.7 percent due to weaker demand for Seychelles two main exports tourism and canned tuna At the same time strong growth in personal earnings and private sector credit have fueled a surge in imports putting further pressure on the balance of payments As a result the exchange rate depreciated an estimated 11 percent in nominal effective terms from early August to late October

Operational Guidance Note On Program Design and Conditionality International Monetary Fund. Strategy, Policy, & Review Department, 2024-01-30 This note aims to provide guidance on the key principles and considerations underlying the design of Fund supported programs The note expands on the previous operational guidance notes on conditionality published over 2003-2014 incorporating lessons from the 2018-19 Review of Conditionality and other recent key policy developments including the recommendation of the Management's Implementation Plan in response to Independent Evaluation Office (IEO)'s report on growth and adjustment in IMF supported programs The note in particular highlights operational advice to i improve the realism of macroeconomic forecast in programs and fostering a more systematic analysis of contingency plans and risks ii improve the focus depth implementation and tailoring of structural conditions (SCs) with due consideration of growth effects and iii help strengthen the ownership of country authorities Designed as a comprehensive reference and primer on program design and conditionality in an accessible and transparent manner the note refers in summary to a broad range of economic and policy considerations over the lifecycle of Fund supported programs As with all guidance notes the relevant IMF Executive Board Decisions remain the primary legal authority on matters covered in this note

Beam Test Calorimeter Prototypes for the CMS Calorimeter Endcap Upgrade Thorben Quast, 2022-01-24 In order to cope with the increased radiation level and the challenging pile up conditions at High Luminosity LHC the CMS collaboration will replace its current calorimeter endcaps with the High Granularity Calorimeter (HGCal) in the mid 2020s This dissertation addresses two important topics related to the preparation of the HGCal upgrade experimental validation of its silicon based design and fast simulation of its data Beam tests at the DESY Hamburg and the

CERN SPS beam test facilities in 2018 have been the basis for the design validation. The associated experimental infrastructure, the algorithms deployed in the reconstruction of the recorded data as well as the respective analyses are reported in this thesis. First, core components of the silicon-based prototype modules are characterised, and it is demonstrated that the assembled modules are functional. In particular, their efficiency to detect minimum ionising particles (MIPs) traversing the silicon sensors is found to be more than 98% for most of the modules. No indication of charge sharing between the silicon pads is observed. Subsequently, the energy response is calibrated in situ using the beam test data. Equalisation of the different responses among the readout channels is achieved with MIPs, hereby deploying the HGCAL prototype as a MIP tracking device. The relative variation of the inferred calibration constants amounts to 3% for channels on the same readout chip. The calibration of the time of arrival information is performed with an external time reference detector. With it, timing resolutions of single cells, including the full prototype readout chain, around 60ps in the asymptotic high energy limit are obtained. The calorimetric performance of the HGCAL prototype is validated with particle showers induced by incident positrons and charged pions. For electromagnetic showers, the constant term in the relative energy resolution is measured to be 0.52 ± 0.08 %, whereas the stochastic term amounts to 22.2 ± 0.3 %/GeV. This result is in good agreement with the calorimeter simulation with GEANT4. The prototype's positioning resolution of the shower axis, after subtracting the contribution from the delay wire chambers in the beam line used as reference, is found to be below 0.4 mm at 300 GeV. At the same energy, the angular resolution in the reconstruction of the electromagnetic shower axis in this prototype is measured to be less than 5mrad. The analysis of the hadronic showers in this thesis makes use of state-of-the-art machine learning methods that exploit the calorimeter's granularity. It is indicated that the energy resolution may be improved using software compensation, and also that the separation of electromagnetic and charged pion-induced showers in the calorimeter may benefit from such methods. The measurements of the hadronic showers are adequately reproduced by GEANT4 simulation. Altogether, the obtained results from the analysis of the beam test data in this thesis are in agreement with the full functionality of the silicon-based HGCAL design. The final part of this thesis provides a proof of principle that generative modelling based on deep neural networks, in conjunction with the Wasserstein distance, is a suitable approach for the fast simulation of HGCAL data. Instead of sequential simulation, a deep neural network-based generative model generates all calorimeter energy depositions simultaneously. This generator network is optimised through an adversarial training process using a critic network guided by the Wasserstein distance. The developed framework in this thesis is applied to both GEANT4 simulated electromagnetic showers and to positron data from the beam tests. Ultimately, this fast simulation approach is up to four orders of magnitude faster than sequential simulation with GEANT4. It is able to produce realistic calorimeter energy depositions from electromagnetic showers, incorporating their fluctuations and correlations when converted into typical calorimeter observables.

Adequacy of the Global Financial Safety Net--Proposal for a New Policy Coordination Instrument

International Monetary Fund. Strategy, Policy, & Review Department, International Monetary Fund. Legal Dept., 2017-07-26

The global financial safety net GFSN has become larger and more decentralized creating a need for greater coordination The expanded GFSN has created multiple sources of official financing for countries in need of support to address balance of payments shocks Enhanced coordination among these layers would facilitate a more efficient use of global resources and provide better incentives for implementing sound policies A new non financing Policy Coordination Instrument PCI would address gaps in the GFSN and the Fund s toolkit The new Policy Coordination Instrument is designed for countries that are seeking to unlock financing from multiple sources and or to demonstrate a commitment to a reform agenda It would enable a closer policy dialogue between the Fund and countries more regular monitoring of economic developments and policies as well as Board endorsement of those policies It would be available for all member countries The key design features draw on Fund financing arrangements and the Policy Support Instrument PSI with some important differences These include no qualification criteria a review based approach for monitoring of conditionality and a more flexible review schedule The PCI is part of a broader set of Fund policy proposals to improve coordination with RFAs enhance liquidity provision for members and ensure the cohesion of the Fund s toolkit The IMFC and the G20 called for further work to strengthen the GFSN and to improve cooperation between the Fund and regional financing arrangements RFAs In response the Fund has produced a diagnostic of the GFSN and the Fund s toolkit and identified important gaps Introduction of the PCI when considered together with the other proposals will help to move towards a GFSN with improved coverage more reliable support and better coordination between the various layers

Pakistan International Monetary Fund. Middle East and Central Asia Dept.,2024-01-19 Recent developments Following the 2022 floods and the acute financial pressures earlier in the year economic activity has stabilized and inflation has begun to gradually decline on the back of strong policy adjustment External pressures have eased somewhat since June and the SBP has taken advantage of renewed inflows to begin rebuilding foreign exchange FX reserves Fiscal performance has also improved with the general government achieving a primary surplus in FY24Q1 Despite this welcome progress the outlook is still challenging and downside risks remain exceptionally high

Georgia International Monetary Fund. Middle East and Central Asia Dept.,2013-04-03 The new government is committed to prudent macroeconomic policies and to enhancing Georgia's business friendly environment Large external liabilities plus its high current account deficit remain the main sources of vulnerability and reducing these in an orderly manner is a key macroeconomic challenge Greater exchange rate flexibility should help align its monetary policy and exchange rate decisions more closely with its inflation Maintaining central bank independence and increasing monetary policy transparency are welcomed by the Executive Directors The impressive structural agenda aims at improving the business environment and at boosting competitiveness
