Behavioral and Social Sciences and Education, Center for Education, Committee on Early Childhood Mathematics, 2009-12-13
Early childhood mathematics is vitally important for young children's present and future educational success. Research
demonstrates that virtually all young children have the capability to learn and become competent in mathematics.
Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's
potential in mathematics is not fully realized, especially those children who are economically disadvantaged. This is due in
part to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home
and in their communities. Improvements in early childhood mathematics education can provide young children with the
foundation for school success. Relying on a comprehensive review of the research, *Mathematics Learning in Early Childhood*
lays out the critical areas that should be the focus of young children's early mathematics education. It explores the extent to
which they are currently being incorporated in early childhood settings and identifies the changes needed to improve the
quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early
childhood mathematics. It will be especially useful for policy makers and practitioners, those who work directly with children
and their families in shaping the policies that affect the education of young children. *Catalog of Copyright Entries. Third*

Leal Filho, Robert W. Marans, John Callewaert, 2017-10-26 In this handbook, social science researchers who focus on
sustainability present and discuss their findings, including empirical work, case studies, teaching and learning innovations, and
applied projects. As such, the book offers a basis for the dissemination of information, ideas, and experiences acquired in the
execution of research projects, especially initiatives which have influenced behavior, decision making, or policy. Furthermore, it
introduces methodological approaches and projects which aim to offer a better understanding of sustainability across society
and economic sectors. This multidisciplinary overview presents the work of researchers from across the spectrum of the
social sciences. It stimulates innovative thinking on how social sciences influence sustainable development and vice versa.
