The Long Haul Pioneers Ashley Coghill, 2020-02-01 It all started in 1964 when two friends gave up promising medical careers to embark upon a journey which few hardened truckers would have considered. In so doing they were solely responsible for creating the first long haul overland route across Europe and deep into the Middle East to Kabul. The men had started the Middle East Run, which was to become a phenomenon in the road haulage industry, an image which it still holds today. This book is about the company founded by one of those men from its fledgling days as Asian Transport to the thriving Astran Cargo Services Ltd that it is today. In this book Ashley Coghill documents the complete history of the company to date with the focus predominantly on the early days when the men were fighting for something and revelling in the adventure. These early long haul drivers would think nothing of a 10 000 mile round trip to Iran or the Arabian Gulf and being stranded at 6 000 feet on a mountain pass with temperatures below 40 was just all in a day's work. Ashley Coghill has an immense enthusiasm for his subject and has given his research total dedication. He has also tracked down past and present employees to gather first hand information which he has illustrated with over 300 carefully selected images. The end result is a detailed comprehensive and fascinating account of an extraordinary company.

Data Sharing Regulation in Europe Laura Zoboli, Maciej Bernatt, 2025-05-28 This book provides a comprehensive examination of data sharing within the EU, exploring the regulatory challenges and opportunities created by EU frameworks and policies. As data becomes a critical resource across sectors, EU regulators, policymakers and scholars face the urgent task of crafting frameworks that support data sharing while ensuring fairness, competition and protection of personal data. Through its chapters, the book adopts a holistic approach, analyzing data sharing from the perspectives of EU law, intellectual property, competition law, data protection and governance. It addresses the impact of recent EU legislation, including the Digital Markets Act (DMA), Digital Services Act (DSA), Data Governance Act and Data Act, on enabling or limiting data sharing practices, particularly in the private sector. Each chapter offers policy recommendations and insights, collectively building a robust theoretical framework for responsible data sharing. This book serves as a valuable resource for researchers, practitioners and students of EU law, competition law, data protection, intellectual property and governance, offering timely insights and a nuanced exploration of the evolving EU data sharing landscape.

The Commercial Motor, 1980 Fleet Owner, 1992 **A History of Kepstowe Freight Services Ltd.** Mat Ireland, 2024-12-30 The long haul overland run to the old Soviet Union prior to Perestroika, Glasnost and the collapse of communism under Gorbachov, back in the 1980s and 90s, has never really been documented in a book. Other than an occasional tale of the difficulties involved, verbalised in pub conversations and passed by word of mouth to those who might be interested enough to listen, it would never see the light of day. This tome is an excellent attempt by the author Mat Ireland to put that lack of the written word to rights. There have been a number of books published about the Golden Era of overland haulage to the Middle East. But while that particular adventure was taking place, there were other frontiers being quietly breached and explored by hauliers pursuing a different market. This book is the story of just such a transport company.

Kepstowe Freight Sometimes known as the alternative Middle East the overland routes into the old Soviet Union have never had their story recorded in print yet they were just as gruelling on the driver and machine as any trips to the Arabian Peninsula or Iran Whereas most people's perception of the Middle East is all sunshine and sand the same people's perception of Russia is often all snow and freezing temperatures Of course neither picture is the total truth and the overbearing heat arid climes and loneliness of the central Russian steppes could easily rival the desertification of Syria and Iraq Kepstowe Freight was one of the British companies pioneering these early journeys behind the Iron Curtain into the dark scary world of Soviet Union communism Featuring mostly previously unseen photographs A History of Kepstowe Freight Services Ltd repeats drivers recollections about their escapades and adventures into a land rarely visited by western society and their attempts at dealing with the inherent corruption horrendous roads and unpredictable weather along the way It goes on to show how exponentially rapidly the country changed after its 1990 collapse with the accompanying culture shock to the populace and especially to the transport system
