Globalisation and the Future of Terrorism Brynjar Lia, 2007-05-07 This new study is devoted to understanding how international terrorism is shaped how it evolves and what we can expect in the future Drawing upon research and methods outside the traditional focus and by taking both a theoretical approach and a new practical predictive perspective it delivers a fresh and fascinating contribution to terrorism studies While predicting terrorism is a highly speculative business there are ways of identifying certain long term causes driving forces and their links with society Terrorists are usually integral players in local and sometimes global politics Hence when the local regional and international contexts change so does terrorism Thoroughly reviewing the body of literature on the causes of terrorism this study also combines predictive and futuristic analyses on globalisation supported by a range of key case studies It spans from the transformation of international relations the globalisation of the market economy demographic factors ideological shifts and technological changes The result is a set of key conclusions about the future patterns of terrorism which are not simply best guesses but also backed up by solid research This book will be of great interest to all students and scholars of terrorism globalisation politics and international relations

The Evolution of EU Counter-terrorism Raphael Bosson, 2013 This book traces the evolution of the EU's fight against terrorism from the late 1970s until the end of the first decade after 9/11 This historical analysis covers both EU internal and international counterterrorism policies and features an in depth account of the EU's reaction to the terrorist incidents in New York Madrid and London In the first few weeks after these incidents the EU mobilised a complex but also incoherent set of policy measures which significantly influenced the course of European security over the years From a theoretical perspective this volume argues that context specific factors dominated over functionalist considerations in the EU's fight against terrorism Building on frameworks from public policy analysis the author demonstrates that EU institutions played a critical role as policy entrepreneurs while the many security measures were chosen on the basis of timing rather than significance Such short term political dynamics also explain the implementation deficits and persistent imbalances in the EU's counterterrorism policy limitations which still hinder its fight against international terrorism This book will be of much interest to students of EU policy counter terrorism European security public administration foreign policy and IR in general
