

English-Warlpiri Dictionary

- The original dictionary is one-way Warlpiri to English, but a bidirectional bilingual dictionary is more useful for most users
- An English index was built from glosses in the dictionary such that each gloss links to the equivalent Warlpiri entries.
- Rather than being two separate monolingual dictionaries, these dictionaries share the same data, thus eliminating conflicting entries and maintaining consistency
- The XML entries of all the Warlpiri equivalents to an English word are merged, and passed to an XSL T spreadsheet, which creates an HTML page for the English word

Warlpiri English Dictionary Of True:

English-Warlpiri Dictionary ,1987 *The Semantics of Polysemy* Nick Riemer,2008-08-22 This book addressed primarily to students and researchers in semantics cognitive linguistics English and Australian languages is a comparative study of the polysemy patterns displayed by percussion impact hitting verbs in English and Warlpiri Pama Nyungan Central Australia The opening chapters develop a novel theoretical orientation for the study of polysemy via a close examination of two theoretical traditions under the broader cognitivist umbrella Langackerian and Lakovian Cognitive Semantics and Wierzbickian Natural Semantic Metalanguage Arguments are offered which problematize attempts in these traditions to ground the analysis of meaning either in cognitive or neurological reality or in the existence of universal synonymy relations within the lexicon Instead an interpretative rather than a scientific construal of linguistic theorizing is sketched in the context of a close examination of certain key issues in the contemporary study of polysemy such as sense individuation the role of reference in linguistic categorization and the demarcation between metaphor and metonymy The later chapters present a detailed typology of the polysemous senses of English and Warlpiri percussion impact or P I verbs based on a diachronically deep corpus of dictionary citations from Middle to contemporary English and on a large corpus of Warlpiri citations Limited to the operations of metaphor and of three categories of metonymy this typology posits just four types of basic relation between extended and core meanings As a result the phenomenon of polysemy and semantic extension emerges as amenable to strikingly concise description **Papers in Australian Linguistics** ,1983 **Papers in Pidgin and Creole Linguistics No. 3** ,1983 Papers with Indigenous Australian content separately catalogued **Pacific Linguistics** ,1970 **The Oxford Guide to Australian Languages** Claire Bower,2023-06-19 The Oxford Guide to Australian Languages is a wide ranging reference work that explores the more than 550 traditional and new Indigenous languages of Australia Australian languages have long played an important role in diachronic and synchronic linguistics and are a vital testing ground for linguistic theory Until now however there has been no comprehensive and accessible guide to the their vast linguistic diversity This volume fills that gap bringing together leading scholars and junior researchers to provide an up to date guide to all aspects of the languages of Australia The chapters in the book explore typology documentation and classification linguistic structures from phonology to pragmatics and discourse sociolinguistics and language variation and language in the community The final part offers grammatical sketches of a selection of languages sub groups and families At a time when the number of living Australian languages is significantly reduced even compared to twenty year ago this volume establishes priorities for future linguistic research and contributes to the language expansion and revitalization efforts that are underway **Quaderni Di Semantica** ,1989 **Ants, ancestors and medicine: a semantic and pragmatic account of classifier constructions in Arrente (Central Australia)** , **People and Change in Indigenous Australia** Diane Austin-Broos,Francesca Merlan,2017-11-30 People and Change in Indigenous Australia arose from a conviction that

more needs to be done in anthropology to give a fuller sense of the changing lives and circumstances of Australian indigenous communities and people Much anthropological and public discussion remains embedded in traditionalizing views of indigenous people and in accounts that seem to underline essential and apparently timeless difference In this volume the editors and contributors assume that the person is socially defined and reconfigured as contexts change both immediate and historical Essays in this collection are grounded in Australian locales commonly termed remote These indigenous communities were largely established as residential concentrations by Australian governments some first as missions most in areas that many of the indigenous people involved consider their homelands A number of these settlements were located in proximity to settler industries pastoralism market gardening and mining locales that many non indigenous Australians think of as the homes of the most traditional indigenous communities and people The contributors discuss the changing circumstances of indigenous people who originate from such places revealing a diversity of experiences and histories that involve major dynamics of disembedding from country and home locales re embedding in new contexts and reconfigurations of relatedness The essays explore dimensions of change and continuity in childhood experience and socialization in a desert community the influence of Christianity in fostering both individuation and relatedness in northeast Arnhem Land the diaspora of Central Australian Warlpiri people to cities and the forms of life and livelihood they make there adolescent experiences of schooling away from home communities youth in kin based heavy metal gangs configuring new identities and indigenous people of southeast Australia reflecting on whether an Aboriginal way can be sustained By taking a step toward understanding the relation between changing circumstances and changing lives of indigenous Australians the volume provides a sense of the quality and feel of those lives

Collins English Dictionary John Sinclair, 1994 Since the new edition of Collins English Dictionary CED two and a half years ago major revolutions have struck the countries we knew as the USSR Czechoslovakia and Yugoslavia new states such as Eritrea have arisen heads of state have come and gone This edition has therefore been published with the aim of giving the user the latest encyclopaedic coverage Over 1000 entries have been updated to reflect recent political change since 1991 new terms from the media like ethnic cleansing and Euro sceptic or for the media ratpack from music techno from film body double and from technology cache memory The 200 special subject field areas are covered by Specialist Consultants

Apisteology Jack David Eller, 2025-06-25 This book unites the burgeoning scholarly literature on not believing in various disciplines into a proposed new field of apisteology It demonstrates that not believing like not knowing is a worthy and distinct subject and not merely a vacuum where belief like knowledge is lacking Several contemporary issues appear repeatedly in the book such as conspiracy theories vaccine skepticism climate change denial and fake news Each chapter begins with a vignette on one of these topics and ends with a section looking ahead to what certain disciplinary approaches to not believing can tell us Not only does this format allow us to consider how not believing is pervasive and distinct but it also allows us to consider what apisteology as a distinct field of study brings to the

table Ultimately the book's consistent appeals to the constructed quality of not believing to the trust and commitment dimensions of not believing and to the critique of truth as the central or only interest in belief make it key reading for scholars and students across the social sciences and humanities

Social Anthropology and Australian Aboriginal Studies Ronald Murray Berndt, Robert Tonkinson, 1988 Shifts of emphasis from 1961-1986 in the study of Aboriginal economy kinship gender issues religion law and social anthropology papers by C Anderson J A Barnes R M Berndt and R Tonkinson I Keen F Merlan H Morphy and N M Williams annotated separately

Monster Anthropology in Australasia and Beyond Y. Musharbash, G. Presterudstuen, 2014-11-19 Offering a dialogue between anthropology and literature culture and media this book presents fine grained ethnographic vignettes of monsters dwelling in the contemporary world These monsters hail from Aboriginal Australia the Pacific Asia and Europe and their presence is inextricably intertwined with the lives of those they haunt

Values and Valuables Cynthia Ann Werner, Duran Bell, 2004 This volume brings together anthropologists and economists to discuss the complex ways in which different cultures imbue material objects with symbolic qualities whose value cannot be reduced to material or monetary equivalents

Australian National Bibliography, 1996

English Speech Act Verbs Anna Wierzbicka, 1987

Ergativity Alana Johns, Diane Massam, Juvenal Ndayiragije, 2007-02-05 The overarching theme of this volume is the formal expression of the range and limits of ergativity The book contains cutting edge theoretical papers by top authors in the field who also conduct original field work and bring new data to light It contains articles that apply the most recent theoretical tools to the area of ergativity and then explore the issues that emerge Languages investigated in the text include Basque Georgian and Hindi

Drawn from the Ground Jennifer Green, 2014-05-08 Provides a multimodal analysis of women's sand stories from Central Australia showing how speech sign gesture and drawing work together

Semantics and The Lexicon James Pustejovsky, 2012-12-06 The goal of this book is to integrate the research being carried out in the field of lexical semantics in linguistics with the work on knowledge representation and lexicon design in computational linguistics Rarely do these two camps meet and discuss the demands and concerns of each other's fields Therefore this book is interesting in that it provides a stimulating and unique discussion between the computational perspective of lexical meaning and the concerns of the linguist for the semantic description of lexical items in the context of syntactic descriptions This book grew out of the papers presented at a workshop held at Brandeis University in April 1988 funded by the American Association for Artificial Intelligence The entire workshop as well as the discussion periods accompanying each talk were recorded Once complete copies of each paper were available they were distributed to participants who were asked to provide written comments on the texts for review purposes

VII
JAMES PUSTEJOVSKY 1 INTRODUCTION There is currently a growing interest in the content of lexical entries from a theoretical perspective as well as a growing need to understand the organization of the lexicon from a computational view This volume attempts to define the directions that need to be taken in order to achieve the goal of a coherent theory of lexical

organization *Verbal Communication* Andrea Rocci, Louis de Saussure, 2016-03-07 Common sense tells us that verbal communication should be a central concern both for the study of communication and for the study of language. Language is the most pervasive means of communication in human societies especially if we consider the huge gamut of communication phenomena where spoken and written language combines with other modalities such as gestures or pictures. Most communication researchers have to deal with issues of language use in their work. Classic methods in communication research from content analysis to interviews and questionnaires not to mention the obvious cases of rhetorical analysis and discourse analysis presuppose the understanding of the meaning of spontaneous or elicited verbal productions. Despite its pervasiveness verbal communication does not currently define one cohesive and distinct subfield within the communication discipline. The Handbook of Verbal Communication seeks to address this gap. In doing so it draws not only on the communication discipline but also on the rich interdisciplinary research on language and communication that developed over the last fifty years as linguistics interacted with the social sciences and the cognitive sciences. The interaction of linguistic research with the social sciences has produced a plethora of approaches to the study of meanings in social context from conversation analysis to critical discourse analysis while cognitive research on verbal communication carried out in cognitive pragmatics as well as in cognitive linguistics has offered insights into the interaction between language inference and persuasion and into cognitive processes such as framing or metaphorical mapping. The Handbook of Verbal Communication volume takes into account these two traditions selecting those issues and themes that are most relevant for communication scholars. It addresses background matters such as the evolution of human verbal communication and the relationship between verbal and non verbal means of communication and offers an extensive discussion of the explicit and implicit meanings of verbal messages with a focus on emotive and figurative meanings. Conversation and fundamental types of discourse such as argument and narrative are presented in depth as is the key notion of discourse genre. The nature of writing systems as well as the interaction of spoken or written language with non verbal modalities are devoted ample attention. Different contexts of language use are considered from the mass media and the new media to the organizational contexts. Cultural and linguistic diversity is addressed with a focus on phenomena such as multilingual communication and translation. A key feature of the volume is the coverage of verbal communication quality. Quality is examined both from a cognitive and from a social perspective. It covers topics that range from the cognitive processes underlying deceptive communication to the methods that can be used to assess the quality of texts in an organizational context.
