Surfers ride the crest of a progressive wave because they are moving faster than the water. If they were stationary, they would be swept up and down by the moving water and would never be able to ride the wave because the crest of the progressive wave is always moving.

This graph shows the displacement of a particle in a transverse wave. The particle is always moving up and down, perpendicular to the direction of the wave.

Sound Waves

There are four types of wave motion: longitudinal, transverse, surface, and electromagnetic.

Longitudinal Waves

Longitudinal waves move in the same direction as the wave itself. Example: sound waves. The particles move back and forth.
