## Saturn Sc 2015 Manual:

*The Astrophotography Manual* Chris Woodhouse, 2015-05 The Astrophotography Manual is for those photographers who aspire to move beyond using standard SLR cameras and editing software and who are ready to create beautiful images of nebulae, galaxies, clusters and the solar system. Beginning with a brief astronomy primer, this book takes readers through the full astrophotography process from choosing and using equipment through image capture, calibration and processing. This combination of technical background information and the hands-on approach brings the science down to earth with a practical method to plan for success. Features include Over 400 images, graphs and tables to illustrate these concepts. A wide range of hardware to be used including smartphones, tablets and the latest mount technologies. How to utilize a variety of leading software such as Maxim DL, Nebulosity, Sequence Generator Pro, Photoshop and PixInsight. Case studies showing how and when to use certain tools and overcoming technical challenges. How sensor performance and light pollution relate to image quality and exposure planning.

This textbook is our go-to book; it is an excellent overview of advanced practice in psychiatric nursing. This is the text that we use in our seminar courses during clinical and we also use it in our review for our ANCC boards. Our students' scores were 92% this past year. We are very pleased with this textbook. Dr. Cheryl Zauderer, PhD, CNM, PMHNP, BC, Associate Dean of Graduate Programs, Co-Coordinator PMHNP Program, Hunter-Bellevue School of Nursing.

Now in its third edition, this revised reference continues to serve as the only foundational resource for APRNs to incorporate a focus on integrative interventions with mental health issues across the lifespan. New chapters on Legal and Ethical Decision Making and LGBTQ Issues, Care of Sexual and Gender Minority Patients, and Increasing Resilience in Advanced Practice Mental Health Nurses shed light on vital contemporary issues. This text offers expanded coverage on telehealth, population health, and the updated AACN Essentials. Additionally, the third edition provides 10 practical case studies illustrating specific syndromes as well as 2019 updates to the ANCC certification exam. It provides expanded instructor resources including a Test Bank and PowerPoints. Comprehensive and practical, this text is organized around commonly seen clinical constellations of psychiatric symptoms and covers neurobiology, theory, and research evidence along with pharmacological information relevant to each syndrome. It delivers an abundance of valuable interventions from which clinicians and clients can co-create the most effective individualized interventions. Popular decision trees provide an algorithm to help students work through the process of evaluating and treating patients, and a lifespan focus prepares students for treating patients in all age groups.
