

Essay on Save Environment

The environment, our planet's intricate web of ecosystems, provides us with essential resources and sustains all forms of life. However, human activities have increasingly placed a strain on the environment, leading to ecological imbalances, climate change, and the loss of biodiversity. In this essay, we will explore the importance of saving the environment, the challenges we face, and the individual and collective actions we can take to ensure a sustainable future for generations to come.

Sustainable Poetry Leonard M. Scigaj,2014-07-11 Focusing on the work of A R Ammons Wendell Berry W S Merwin and Gary Snyder author Leonard Scigaj shows that just as a sustainable society does not depreciate its resource base so a sustainable poetry does not restrict interest to language Over the past thirty years many poets have shown an increasing sensitivity to ecological thinking But critics trained in poststructuralist language theory often fail to explore the substance of ecopoetry Scigaj is the first to define ecopoetry as separate and distinct from nature or environmental poetry marked by its concern with balancing the interests of human beings with the needs of nature Just as science learned that the earth was not

the center of the universe ecopoetry insists on the recognition that humans are not at the center of the natural world U.S. Environmental Protection Agency Library System Book Catalog Holdings as of July 1973 United States. Bruno,2013-05-09 Life philosophy central to 19th century philosophical thought is concerned with the meaning value and purpose of life This much needed study returns to the central philosophical questions of Lebensphilosophie and reveals the ascendancy of life in contemporary philosophical thinking Scholars from the disciplines of political theory aesthetics bioethics and ontology examine how the notion of life has made its way into contemporary philosophical discussions They explore three main themes the shift toward biological and technological views of life the political implications of our conceptions of life and the re emergence of the idea of life in recent philosophical discussions about for example care of the self scepticism tragedy desire the emotions and history Anticipating new directions of philosophical thinking this study restores a vital school of thought to crucial considerations about the dangers of contemporary politics and the threat of new technologies *Value and Values* Roger T. Ames,Peter D. Hershock,2015-02-28 The most pressing issues of the twenty first century climate change and persistent hunger in a world of food surpluses to name only two are not problems that can be solved from within individual disciplines nation states or cultural perspectives They are predicaments that can only be resolved by generating sustained and globally robust coordination across value systems The scale of the problems and necessity for coordinated global solutions signal a world historical transit as momentous as the Industrial Revolution a transition from the predominance of technical knowledge to that of ethical deliberation This volume brings together leading thinkers from around the world to deliberate on how best to correlate worth value with what is worthwhile values pairing human prosperity with personal environmental and spiritual flourishing in a world of differing visions of what constitutes a moral life Especially in the aftermath of what is now being called the Great Recession awareness has mounted of the imperative to question the modern divorce of economics from ethics While the domains of economics and ethics were from antiquity through at least the eighteenth century understood in many cultures to be coterminous and mutually entailing the modern assumption has been that the goal of maximizing human prosperity and the aim of justly enhancing our lives as persons and as communities were functionally and practically distinct Working from a wide array of perspectives the contributors to this volume offer a set of challenges to the assumed

independence of the quantitative and qualitative dimensions of human and planetary well being Reflecting on the complex interrelationship among economics justice and equity the book resists one size fits all approaches and struggles to revitalize the marriage of economics and ethics by activating cultural differences as the basis of mutual contribution to shared human flourishing The publication of this important collection will stimulate or extend critical debates among scholars and students working in a number of disciplines in the social sciences and humanities including philosophy history environmental studies economics and law Contributors Roger T Ames James Behuniak Jr Steve Bein Nalini Bhushan Purushottama Bilimoria Steven Burik Amita Chatterjee Baoyan Cheng Gordon Davis Jay L Garfield Steven F Geisz Peter D Hershock Larry A Hickman Kathleen M Higgins Heidi M Hurd Thomas P Kasulis Workineh Kelbessa Lori Keleher Oliver Leaman James McRae Jin Y Park James Peterman Naoko Saito May Sim Robert Smid Paul Standish Kenneth W Stickers Karsten J Struhl Meera Sushila Viswanathan Wu Shiu Ching Xu Di T Yamauchi Yang Liuxin *The Environment and International Relations* Mark Imber, John Vogler, 2005-08-12 Environmental issues and questions of global change are now firmly established on the international political agenda This book provides a wide ranging survey of the current treatment of environmental issues in international relations This book begins by looking at the relevance of the different theoretical approaches current in international relations to the study of the environment It analyzes a wide range of approaches from the debate between neo realism and liberal institutionalism to the significant connections between gender and global environmental change The book goes on to consider a range of key international processes discussing the monitoring and implementation of environmental agreements the place of ideology in negotiations and the role of international organisations **Living in the Environment** George Tyler Miller, 1998 This book is designed to be used in introductory courses on environmental science It treats environmental science as an interdisciplinary study combining ideas and information from natural sciences and social sciences
