The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-29 In an era when corporate and political leaders are using their power to control every aspect of the schooling process in North America there has been surprisingly little research on the impact of textbook content on students. The contributors of this volume and its partner *The New Politics of the Textbook: Problematizing the Portrayal of Marginalized Groups in Textbooks* guide educators school administrators academics and other concerned citizens to unpack the political social and cultural influences inherent in the textbooks of core content areas such as math science English and social science. They urge readers to reconsider the role textbooks play in the creation of students' political social and moral development and in perpetuating asymmetrical social and economic relationships where social actors are bestowed unearned privileges and entitlements based upon their race gender sexuality class religion and linguistic background. Finally they suggest ways to resist the hegemony of those texts through critical analyses critical questioning and critical pedagogies.
