Entangled Narratives Lars-Christer Hydén, 2018 As people are living longer on average than ever before the number of those with dementia will increase Because many will live a considerable time at home with their diagnosis we need to know more about the ways people can adapt to and learn to live with dementia in their everyday lives Lars Christer Hydén argues in this book that to do so will involve re imagining what dementia really is and what it can mean to the afflicted and their loved ones One of the most important everyday opportunities for sharing experiences is the simple act of storytelling But when someone close to you gradually loses the ability to tell stories and cherish the shared history you have together this is seen as a threat to the relationship to the feeling of belonging together and to the identity of the person diagnosed Therefore learning about how people with dementia can participate in storytelling along with their families and friends helps to sustain those relationships and identities In *Entangled Narratives* Hydén not only emphasizes the possibilities that are inherent in collaborative storytelling but instructs professionals and otherwise healthy relatives to learn how to effectively listen and ultimately re imagine their patients and loved ones as collaborative meaning makers in their lives
