Contemporary Pedestrian Landscape explores the significant physical and cultural changes in our urban areas following the
implementation of design strategies and increased pedestrian activity Beginning with a history of the urban grid the book
then discusses experiential factors of pedestrianized urban landscapes in three scales arterials collectors and locals with an
emphasis on inductive and deductive design alternatives It closely examines elements derived from current urban pedestrian
experiences including form scale surfaces and identity and provides alternative design solutions for the future Uniquely
focusing on a hierarchical discussion of the quality of contemporary landscape design applications within the urban grid and
