Experiencing Childhood in Ancient Athens Emma Gooch, 2025-03-26 Experiencing Childhood in Ancient Athens uses literary sources and archaeological and iconographic evidence to investigate children's identities throughout the ninth to fourth centuries BCE in Athens and Attica the city's surrounding hinterland The book presents detailed analyses of mentions of children in ancient sources scenes showing children on Geometric black figure red figure and white ground painted pottery and carved marble grave markers as well as child burials Examples of each are thoroughly catalogued and extensively illustrated The analyses conducted identify material cultures of children and childhood objects used by children themselves and objects used when caring for children that can be used to investigate children's identities in houses and in society across the extended life course so in life and after death The research presented compares the range of objects associated with children at different times and in different contexts to suggest how children's identities and how Athenian society conceptualised them and childhood changed throughout the Geometric Archaic and Classical periods as the Greek polis system was established and Athenian democracy developed The evidence considered suggests childhood became an increasingly distinct stage in the ancient Greek life course throughout the period 900 to 323 BCE but it also demonstrates that children did not necessarily become more prominent in Attic society as a consequence It suggests that children's identities and the symbolism of them in many ways remained constant with children always prized for the stability and continuity they represented but appreciated for their role in perpetuating society with increasing frequency over time and more when society was under threat Ultimately the author suggests major socio-political change impacted children's experiences of childhood and what it meant to be a child in ancient Athens primarily because of how it affected the agency of their family members especially the women responsible for caring for them warfare and political transformation concentrated in the Classical period gave women more agency to influence the range of material culture made for children making characterisations of them in art at once more realistic and more common even when other evidence suggests children were in fact probably less visible in society

The Roman Family in Italy Beryl Rawson, Paul Richard Carey Weaver, 1999 The family continues to be seen as a central institution in Roman as well as modern Western society The Roman family is often used as a stereotype sometimes of severity sometimes of decadence with its decline often cited as a cause of wider decline and fall Definitions and concepts continue to be modified and nuanced however as the availability of new evidence and new methodologies make possible a much less simplistic picture In this volume the study of family draws on a wide range of disciplines to develop the intertwined themes of status sentiment and space For example on status there are contributions about Junian Latins and a survey of senators' monuments while sentiment is represented by a gloomy but convincing picture of old age and a paper on the sentimental ideal which argues that conflict as well as concord is a feature of family life Space is represented among others by the contribution on who commemorates whom in Roman Italy pointing up the regional variations in custom and the difficulties in tracing complete families The final contributions focus on the house how people

lived in the Roman house the use of rooms and the artefacts that might indicate this use The book makes use of many types of evidence from the legal and literary to the iconographical and archaeological Visual and material evidence play an important role in reconstructing real lives in considerable colour and variety The book moves beyond the city of Rome to the rest of Roman Italy and even into the provinces just as Roman culture moved outwards and mingled with other cultures Chronologically too there are new directions towards the later Empire and Christianity So although the contributors do not abandon any of the territory already gained in Rome nor literary and epigraphical sources nor the late Republic or early Empire there is an exciting sense of new discovery
