to recede from our grasp In this book Christopher M Kelty traces four stories of participation across the twentieth century showing how they are part of a much longer term problem in relation to the individual and collective experience of representative democracy Kelty argues that in the last century or so the power of participation has dwindled over time it has been formatted in ways that cramp and dwarf it even as the drive to participate has spread to nearly every kind of human endeavor all around the world *The Participant* is a historical ethnography of the concept of participation investigating how the concept has evolved into the form it takes today It is a book that asks Why do we participate And sometimes Why do we refuse

In a bold departure from previous scholarship Le Trice D Donaldson locates the often overlooked era between the Civil War and the end of World War I as the beginning of black soldiers involvement in the long struggle for civil rights Donaldson traces the evolution of these soldiers as they used their military service to challenge white notions of an African American second class citizenry and forged a new identity as freedom fighters willing to demand the rights of full citizenship and manhood Through extensive research Donaldson not only illuminates this evolution but also interrogates the association between masculinity and citizenship and the ways in which performing manhood through military service influenced how these men struggled for racial uplift Following the Buffalo soldier units and two regular army infantry units from the frontier and the Mexican border to Mexico Cuba and the Philippines Donaldson investigates how these locations and the wars therein provide windows into how the soldiers struggles influenced black life and status within the United States Continuing to probe the idea of what it meant to be a military race man a man concerned with the uplift of the black race who followed the philosophy of progress Donaldson

contrasts the histories of officers Henry Flipper and Charles Young two soldiers who saw their roles and responsibilities as black military officers very differently Duty beyond the Battlefield demonstrates that from the 1870s to 1920s military race men laid the foundation for the New Negro movement and the rise of Black Nationalism that influenced the future leaders of the twentieth century Civil Rights movement
