Cyclopædia of English Literature Robert Chambers, 1847 The Human Intelligences Valentin Matcas, 2016-04-20
The human mind has two main intelligences the conscious and the subconscious yet this is only a scientific observation meant to define what you access consciously in your mind and what you do not While you want to know everything about the human mind in order to access everything but how can you when you cannot even define it Since there is more to the human mind than what psychology offers and you can certainly tell since it is always in your mind but never in textbooks The two main human intelligences are subdivided into further intelligences which also include their own inner intelligences and it is relevant to know everything Because your subconscious intelligence has its own primal subconscious intelligences specialized in the entirety of your bodily activity as eating recovery socialization reproduction development security learning cooperation wellbeing and interconnectivity But are these your primal intelligences or you are these primal intelligences altogether Who or what exactly are you From a cognitive perspective you may identify yourself with your conscious intelligence since this offers you awareness and conscious reasoning You are certainly aware of all subconscious intelligences stated above yet there are more human intelligences interacting with you and with your entire cognitive system continuously with some exceeding the human mind altogether Additionally you may always employ artificial and consensual human intelligences to enhance your experience and achievement in life at a significant cost since it takes from your natural fulfillment And in this manner you live your life through many intelligences even unknowingly pleasantly or not as these send you your needs and feelings continuously and this is all that you know Apart from needs feelings reasoning and awareness the human intelligences offer a variety of interfaces identities selves and companions to use throughout life you may identify them with ease since they are in your mind while others can reach beyond and it is significant to know them as this adds to your complexity and uniqueness in life Who are you You know well your conscious intelligence since you control it while you are interested in the subconscious intelligence since it remains out of your reach it governs you from the shadows of your mind and if you are not careful it ruins your life since it can go against your will making everything rather challenging and unexpected And if you only knew more about your conscious and unconscious main human intelligences then you were certainly more fulfilled and more successful in life This book studies the human intelligences as these inhabit form and

maintain the human mind in all details and from all perspectives You have the chance to identify and understand all your intelligences allowing you to reason and behave in the most adequate manner toward achieving your harmony meaning and fulfillment in life and in the world
