Corps of Engineers Water Resources Infrastructure Committee on U.S. Army Corps of Engineers Water Resources Science, Engineering, and Planning, Water Science and Technology Board, Division on Earth and Life Studies, National Research Council, 2013-05-01 Over the past century the U S Army Corps of Engineers has built a vast network of water management infrastructure that includes approximately 700 dams 14 000 miles of levees 12 000 miles of river navigation channels and control structures harbors and ports and other facilities. Historically the construction of new infrastructure dominated the Corps water resources budget and activities. Today national water needs and priorities increasingly are shifting to operations maintenance and rehabilitation of existing infrastructure much of which has exceeded its design life. However since the mid 1980s federal funding for new project construction and major rehabilitation has declined steadily. As a result much of the Corps water resources infrastructure is deteriorating and wearing out faster than it is being replaced. Corps of Engineers Water Resources Infrastructure Deterioration Investment or Divestment explores the status of operations maintenance and

rehabilitation of Corps water resources infrastructure and identifies options for the Corps and the nation in setting maintenance and rehabilitation priorities
