**Pediatric Sedation Outside of the Operating Room** Keira P. Mason, MD, 2021-04-13

This book functions as an essential guide to the safe and effective sedation of pediatric patients outside the operating room. It is a multidisciplinary reference that features an international authorship and is also of use for a broad range of specialists who deliver pediatric sedation in the non-OR setting. Organized into four parts: Pediatric Sedation Outside of the Operating Room, 3rd edition begins with the foundational history of the pediatric sedation field. Subsequent chapters explore the basics of procedural sedation, pre-sedation assessments, and sedation policies across various specialties and continents. Part two then examines a multitude of sedation models divided by geographical location and subspecialty. Following this, Part three delves into standards of safety in sedation, including medicolegal risk factors, neurocognitive side effects, and aspiration risks. The book closes with chapters presenting discussions on the future of sedation insofar as predictions for the role of simulation, medical malpractice, and the intersection of sedation and marijuana. An updated, invaluable successor edition, Pediatric Sedation Outside of the Operating Room, 3rd edition is accessible to a diverse group of sedation providers from all specialties. This textbook is an invaluable and necessary addition to all sedation providers worldwide.

**The effect of muscle pathogenesis on avian physiology, animal**

**welfare, and quality of muscle as a food** Wei Guo, Sandra G. Velleman, Gale M. Strasburg, 2025-05-15 Over the past several decades the poultry industry has achieved huge improvements in global poultry production including with increased growth performance improved body composition higher market weight increased feed efficiency reduced production costs and increased profitability for growers These gains have resulted from a combination of intensive genetic selection tailored nutritional approaches and novel poultry management strategies However these improvements in broiler chicken and turkey production have also come with costs These costs include increased susceptibility to environmental stress increased mortality in commercial poultry flocks and muscle pathogenesis ultimately leading to deleterious effects on meat quality traits affecting appearance texture and protein functionality For example a subset of fast growing domestic turkeys develops spontaneous cardiomyopathy or round heart disease that leads to a mortality rate up to 15% at 2 to 4 weeks of age Even turkeys that survive the critical first two weeks after hatch already have damaged hearts at a prevalence of 80% to 90% which may lead to growth retardation during the grow out phase This syndrome can also occur in broiler chickens which causes major economic losses and limits the maximum profitability in the poultry industry world wide Another example is wooden breast an abnormal muscle condition resulting in a hardening of the breast muscle affecting meat texture Other examples include green muscle disease also known as deep pectoral muscle myopathy spaghetti meat and white striping All of these pathologies include the development of myopathic changes subsequently affecting meat quality leading to consumer complaints and economic losses by the processing industry There is a paucity of information on the etiologies of broiler and turkey muscle pathogenesis and their consequent effects on muscle physiology This Research Topic will highlight the mechanisms of skeletal and cardiac muscle pathogenesis in poultry that are responsible for premature bird mortality and altered quality of muscle as a food This research topic will cover the recent findings in the area of myopathies in poultry Original Research and Review papers among other article types are welcome to be submitted to this collection
