

Student Exploration: Circulatory System

Name:

Date:

Directions: Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes.

Vocabulary: artery, atrium, blood vessel, capillary, circulatory system, heart, heart valves, platelet, pulmonary artery, pulmonary vein, red blood cell, urea, ventricle, vein, white blood cell

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Why do you need blood?

Blood transports nutrients and oxygen to different parts of the body, which is prominent for our daily functionality.

2. What organ pushes blood through your body?

The heart pushes blood throughout the body.

Gizmo Warm-up

The **Circulatory System** Gizmo shows the **heart** and **blood vessels** that make up the **circulatory system**. Look at the heart.

1. How many chambers does the heart have?

4

2. Turn on **Show labels**. What are the names of the chambers?

Right atrium

right ventricle

left ventricle

left atrium

3. Do you see tiny "doors" that open and close as blood is pumped through the heart?

Yes

These are **heart valves**. Heart valves control the flow of blood through the heart.

4. Click **Heartbeat sound** and listen for the two parts of the heartbeat, nicknamed "lub" and "dub." Observe the heart. (Note: The recording is not in sync with the heart animation.)

What do you think causes heartbeat sounds?

The blood pumping flowing through the opening and closing of the "doors" (also known as valves).

In fact, the "lub" sound is caused by valves from the **atria** to the **ventricles** closing, and the "dub" sound is caused by the valves from the ventricles to the blood vessels closing.

5. Challenge: Why do you think the left atrium and left ventricle are shown on the *right* side of the diagram?
