Finding Her in History Rosemary Papa, 2017-06-16 This monograph was cultivated from the AERA SIG Women in Education 2016 address and delivers a brief review of his story in terms of the lack of her story being included through three parallel lines 1 historical documents on formation of the family and work in and outside the home from the Paleolithic era 2 the development of traditional religions and the subjugation of women beginning with the conniving seductress Eve and 3 the discussion of major wars and the nation state policies produced throughout history with impacts on girls and women as well the precarious health of the planet This brief review of his story reveals the continued exclusion of her story with the example of Willystine Goodsell a historian ironically erased from history in education The premise that subjugation of women and children as lesser than males has been supported both in the name of protecting them and in shaming them The combined ubiquitous effects of disequilibrium created by mankind in wars religions education social capital economics and politics have ensured his story is the one recorded This monograph suggests a more balanced approach to the written her his story requires inclusion of all the population and the secular educating of especially girls and women Newspaper and Bank Directory of the World Harlan Page Hubbard, 1882

Keys, 2019-02-15 Sport has the power to change on international development the world South African president Nelson Mandela told the Sporting Club in Monte Carlo in 2000 Today we are inundated with similar claims from politicians diplomats intellectuals journalists athletes and fans about the many ways that international sports competitions make the world a better place Promoters of the Olympic Games and similar global sports events have spent more than a century telling us that these festivals offer a multitude of goods that they foster friendship and mutual understanding among peoples and nations promote peace combat racism and spread democracy In recent years boosters have suggested that sports mega events can advance environmental protection in a world threatened by climate change stimulate economic growth and reduce poverty in developing nations and promote human rights in repressive countries If the claims are to be believed sport is the most powerful and effective form of idealistic internationalism on the planet The Ideals of Global Sport investigates these grandiose claims peeling away the hype to reveal the reality that shockingly little evidence underpins these endlessly repeated assertions. The essays written by scholars from many regions

and disciplines and drawn from an exceptionally diverse array of sources show that these bold claims were sometimes cleverly leveraged by activist groups to pressure sports bodies into supporting moral causes But the essays methodically debunk sports organizations inflated proclamations about the record of their contributions to peace mutual understanding antiracism and democracy Exposing enduring shortcomings in the newer realm of human rights protection from the 1980 Moscow Olympic Games to Brazil s 2014 World Cup and the 2016 Rio Olympics The Ideals of Global Sport suggests that sport s idealistic pretensions can have distinctly non idealistic side effects distracting from the staggering financial costs of hosting the events serving corporate interests and aiding the spread of neoliberal globalization Contributors Jules Boykoff Susan Brownell Roland Burke Simon Creak Dmitry Dubrovsky Joon Seok Hong Barbara J Keys Renate Nagamine Jo o Roriz Robert Skinner The Digital Revolution Inder Sidhu, 2015-11-28 The massive transformations driven by digital technology have begun The Digital Revolution gives you a complete roadmap for navigating the breathtaking changes happening now and shows you how to succeed Silicon Valley executive thought leader and New York Times best selling author Inder Sidhu shows how cloud computing social media mobility sensors apps big data analytics and more can be brought together in virtually infinite combinations to create opportunities and pose risks previously unimaginable You ll learn how digital pioneers are applying connected digital technologies also known as the Internet of Everything to dramatically improve financial performance customer experience and workforce engagement in fields ranging from healthcare to education from retail to government Sidhu combines the practical perspective of practitioners with the extensive experience of experts to show you how to win in the new digital age He takes you behind the scenes engaging with business leaders from Apple Google Facebook Cisco Intel Amazon Walmart Starbucks RSA Kaiser Cleveland Clinic Intermountain Healthcare and so on and with academic leaders from Stanford Yale Wharton MIT Coursera Khan Academy and more and reveals their winning strategies and execution tactics for your benefit Sidhu also discusses the key challenges of privacy security regulation and governance in depth and offers powerful insights on managing crucial ethical social cultural legal and economic issues that digitization creates He shows what the digital revolution will mean for you both personally and professionally and how you can win Learn how you can leverage the digital revolution to Deliver superior customer experiences Improve your organization's financial performance Drive employee productivity creativity and engagement Build smart efficient cities brimming with opportunity Make education more effective and relevant Achieve better health outcomes Make retail compelling convenient and profitable Balance privacy with security Protect yourself before during and after a cyberattack Geopolitics of the New Middle East Şaban Kardaş, Bülent Aras, 2023-06-26 Accelerate your career and live a better life This edited book takes a critical look at the geopolitics of the broader Middle East and North Africa MENA region It scrutinizes some of the perennial issues shaping the regional security agenda as well as the emerging geopolitical trends in the wake of a decade of turmoil triggered by the demands for political and economic reforms The contributors explore the

geopolitical implications of the structural transformation process in the MENA region and beyond which has unleashed destabilizing forces and multifaceted conflicts with the involvement of many local regional and global actors They also look at how some of the regional actors have reacted to the risks and security challenges produced by the wave of instability and conflicts and conducted their foreign policy in this volatile period of fluid alliances Other contributors explore the roles and perspectives of major extra regional actors delving deeper into how they have adjusted their policies towards the emergence of a new order and reshuffling of alignments This book will be of interest to researchers and advanced students of politics international relations and political geography It was originally published as a special issue of the Journal of Balkan and Near Eastern Studies The Despot's Accomplice Brian Paul Klaas, 2016 Brian Klaas of the London School of Economics believes in the transformative power of democracy In this comprehensive book he offers prescriptions for Western powers seeking to spread political freedom and critiques many of the halfhearted pro democracy efforts of recent decades The United States recent misadventures in Iraq and Afghanistan chastened many who once espoused nation building But Klaas argues ceasing to promote democracy is a mistake In addition to offering insights and examples gleaned from his global travels to investigate pseudo democracies Klaas also explores America itself taking the US tradition of gerrymandering to task At times Klaas s crusade seems a bit too idealistic but ultimately he makes a passionate and persuasive case for trying to expand democracy s shrinking reach
