A Descriptive and Historical Account of Hydraulic and Other Machines for Raising Water, Ancient and Moderne with Observations on Various Subjects Connected with the Mechanic Arts: Including the Progressive Development of the Steam Engine: ... Thomas Ewbank, 1854      A descriptive and historical account of hydraulic and other machines for raising water, ancient and modern: with observations on various subjects connected with the mechanic arts: including the progressive development of the steam engine, etc. in five books Thomas EWBANK, 1842      Information Multiplicity John Johnston, 1998-05-08 In Information Multiplicity Johnston describes how fractalized realism has redefined thought itself from the High Modernist stream of consciousness into what the machine philosopher Daniel Dennett refers to as multiple drafts or circuits operating concurrently in the human brain In a series of close readings Johnston traces how such a viral influx of information into human consciousness has been replicated in works by Thomas Pynchon Gravity's Rainbow and Vineland Joseph McElroy Lookout Cartridge William Gaddis JR Don DeLillo Libra and William Gibson Neuromancer      **Official Gazette of the United States Patent and Trademark Office** , 2004      **A Descriptive and Historical Account of Hydraulic and Other Machines for Raising Water, Ancient and Modern** Thomas Ewbank, 1842      *Vibration of Structures and Machines* Giancarlo Genta, 2012-12-06 The aim of this book is to address important practical aspects of nonlinear vibration analysis It presents cases rarely discussed in the existing literature on vibration that are problems of considerable interest for researchers and practical engineers such as rotor dynamics and torsional vibration of engines The book can be used not only as a reference but also as a graduate level text as it develops the subject from its foundations and contains problems and solutions for each chapter The book begins with a discussion of vibrations in linear systems with one degree of freedom providing a mathematical and physical basis for the subsequent chapters Linear systems with many degrees of freedom serve to introduce the modal analysis of vibrations as well as some useful computational procedures The book then turns to continuous linear systems discussing both analytical solutions that provide physical insights as well as discretization techniques that supply tools for actual computation The discussion of nonlinear vibrations includes a treatment of chaotic vibrations and other new insights The book concludes with detailed discussions of the dynamics of rotating and reciprocating machinery In this new edition the notation has been modernized the classical approach to vibration and the modern approach through dynamical systems theory have been integrated the material on control and active systems has been completely rewritten and material relevant to mechatronics has been added      A Descriptive and Historical Account of Hydraulic and Other Machines for Raising Water Thomas Ewbank, 1846      Studies In Pattern Recognition: A Memorial To The Late Professor King-sun Fu Herbert Freeman, 1997-02-03 More than ten years have passed since the untimely death of King Sun Fu one of the great pioneers in the field of pattern recognition It was he more than any other single individual who nurtured the field during its formative years and set the tone and tempo for others to follow This book is dedicated to his

memory This book contains 11 chapters by authors who knew King Sun Fu and in varying degrees interacted with him The articles span the field of pattern recognition in its current state and cover such diverse topics as neural nets covariance propagation genetic selection shape description characteristic views for 3D modeling face recognition speech recognition and machine translation In tone they vary from the highly theoretical to the applied Their presentation here is a testimonial by his former colleagues and friends to the pioneer who did so much to bring pattern recognition to its position as a recognized discipline world wide
