Computational Thinking: How computers think, decide and learn, when human limits start and computers champ. Vol.1 Jorge Guerra Pires, 2022-07-05 In 2013 I wrote a book 1 At the time I wanted to explain neural networks in simple terms I had high school students at my mind I have expressed my concerns that machine learning was dominating the world and people had no idea about it smartphones were not popular in Brazil and started to gain attention as personal computers Deep learning started to gain momentum on 2012 and nowadays is kind of the rule At the time YouTube was bad pretty bad a must say I used to save the links to my videos as so I could avoid passing through the main page Computational thinking is synonymous of algorithms I cannot think a single computational routine which is not an algorithm after all computers are stupid they need to be told what to do even when it is abstract e.g. machine learning What is computational think though Think like this a thought experiment Suppose you give your result from your model to someone Do you believe the person would be able to tell the difference between your solution from your algorithm and a human If not this is computational thinking It is a machine i.e. an algorithm a routine doing human thinking work As we are going to see based on Kasabov's work we may actually be able to send thinking loads to computers in the future Initially this book supposes to be called computational intelligence Nonetheless I thought we do not necessarily need intelligence to build models not in the sense to artificial intelligence or even human intelligence Furthermore as we shall learn from Daniel Kahneman and colleagues we can achieve nice models for decision making even with simple models when compared to humans imagine what we can do with machine learning cloud computing databases such as MongoDB and Firebase Possible public Web developers wanting to expand their horizon here I am being modest I feel any web coder should learn computational thinking as so they can add intelligence to their dummy apps People from computational intelligence waiting to learn new tricks Computer scientists for sure I would recommend to computational biologists and anyone interested in bioinformatics Applied mathematics and computational mathematician for sure Anyone that is opened to new ideas but has a minimum computer programming background Maybe medical doctors and biologists one of my PhD advisors was a surgeon with a PhD in mathematics thus we may have this profile in medicine and especially in biology External resources and tricks My GitHub profile Our sandbox I have used links to my LinkedIn profile to posts related to the discussions Feel free to start a conversation on LinkedIn or to connect Just comment on the posts and I will be noticed I have used several external links to articles online this is in addition to the classical academic reference standard With Special

from Medium on Computer programming Jorge Guerra Pires, 2021-12-29 I want thinkers not followers Internet social media in general has this nice feature of making possible for anyone to spread their ideas as said an online influencer on TED Talks everyone has an opinion does everyone has something interesting to say Medium is a website dedicated to independent writers mainly like myself Anyone can write to Medium there is no curation or selection Publications are small organizations that select those articles this is the counterpart of conventional traditional publication systems In addition to independent writings I also write to the Publications Geek Culture Data Driven Investor and JavaScript in Plain English Some articles here were firstly published independently and after that either invited or submitted to a publication or kept as standalone article What is the best way to use this e book The e book was designed to be read it does not focus on anything Some parts are tutorial hands on sections but most of the book is for learning things superficially General topic computer programming More specific topics Angular JavaScript TensorFlow js Deep learning Artificial Neural Networks Computer programming With this e book I hope Give my readers an opportunity to support my online work on a gain gain gesture Concentrate more on content quality less than view catchers and so on Some advantage of the e book compared to Medium All the articles reviewed grammar checked and more Several topics curated for you No distractions as you read Extra articles exclusive for the e book readers Exclusive discussions should you want to talk How to read this e book Even though I have selected the essays using coding as center the writings may still be dispersed wide ranging Therefore this e book can be nice for reading with the hope to learn something new I would imagine that each chapter may call the attention of different people not all of them at once The book can be nice as well to keep around give a first read and from time to time should you need just come back I would read the book randomly at first and keep it around for me when I am solving problems those readings start to come up in my mind and helps to be creative on my solutions Grab your copy on Amazon and start to expand your brain *Donny's*
