Sword, A.W. Waddell, 2012-12-06 This is the fourth volume of Standard Operating Procedures SOPs compiled from documents prepared in these laboratories in part fulfilment of the requirements of various Good Laboratory Practice GLP regulations and guidelines SOPs have now become an everyday feature of work in most industrial and contract toxicology laboratories They provide a written definition of the mechanics of unit operations which together comprise the framework for experiments in safety evaluation Metabolic studies and analytical chemistry are closely linked to toxicology since they embody essential aspects of the overall assessment of product safety Some authorities consider certain parts of these subjects to be outwith the scope of the GLP requirements but for the reasons stated this is contrary to our own view We have tried where possible to define in SOP format for use in our own laboratories the unit operations involved in these disciplines and they form the basis of this volume Some relevant material from previous volumes has been brought together in updated form and is also presented here for completeness Dr I P Sword Managing Director Inveresk Research International Musselburgh EH21 7UB Scotland ix Introduction GENERAL 1 The Food and Drug Administration of the US Government published its Good Laboratory Practice Regulations for Non Clinical Laboratory Studies in the Federal Register 22 December 1978 The Regulations are the culmination of a number of years of investigation into the standards to which safety evaluation studies were performed in laboratories in the USA Handbook of Quality Assurance for the Analytical Chemistry Laboratory J. Dux, 2013-11-11 xii a second edition might be in order and readily agreed Although the basic principles remain the same discussions with analysts laboratory supervisors and managers indicated many areas where improvements could be made For example new chapters have been added on sampling and quality assurance laboratory facilities and quality assurance and auditing for quality assurance Very little of the first edition has been discarded but many topics have been expanded considerably The chapter on computers has been completely rewritten in view of the rapid changes in that field The chapter in the first edition on planning and organizing for quality assurance has been split into two chapters one on planning for quality assurance and the other on organizing and establishing a quality assurance program and new material on mandated quality assurance programs

has been combined with the material on laboratory accreditation Numerous examples especially those involving mathematical calculations have been added at the suggestion of some readers In short this edition is very nearly a new book and I can only hope it is as well received as the first edition CHAPTER 1 Quality Quality Control and Quality Assurance One of the strongest trends in modern society is the continuing evolution from a manufacturing to a service oriented economy
