

Self-Introduction Scholarship Essay

My name is Abigail Lopez. I am a student at Southeastern College completing an associate's degree in science and planning on transferring to a four-year college or university. My educational aspirations consist of acquiring a bachelor's degree in any biological or health science that would assist me in pursuing a medical career as a doctor. On the other hand, my career vision is to one day be able to provide affordable health care to marginalized communities in the United States. However, I am certain that if I do not complete my college degree I could never have the opportunity to achieve my career goals. I decided that I will attain a career as a doctor since my passion has always been assisting others and trying to improve their quality of life. Therefore, I think that pursuing such a career will provide me the opportunity to help improve the community's health quality conditions and learn about their medical needs. After becoming a certified doctor, I want to specialize in oncology, the study of cancer, and add my knowledge to the cancer research field.

Furthermore, I want to contribute back to undeserved populations in the U.S. that struggle every day to sustain a family, and who do not have as much access to medical assistance as other privileged groups. The first health project I want to accomplish throughout my career as a doctor is to establish a free clinic where affordable medical assistance can be provided regardless of the patient's immigration status. The diverse health services would include free doctor consultations, low-price or free medication, and nutritional classes to prevent the presence of diabetes or heart disease. I also intend to provide an interpreter for patients in case they do not speak English and establish a financial assistance program to help patients who are not able to pay for any type of surgery that needs to be performed. The second biggest career goal that I want to accomplish is to establish a non-profit organization where I can create internships for medical school students around the U.S., and allow them to travel to isolated communities around the world to provide free medical services. I also want to provide nutrition education to support these marginalized communities, especially indigenous groups from Latin American countries. This will help contribute to the physical development of kids and offer a solution to malnutrition. I know that all of my goals will remain dreams if I do not complete my medical degree. Therefore, I am committed to working hard in school and looking for opportunities that could help me make my goals a reality.

Reconstructing Response to Student Writing Dan Melzer, 2023-08-07 In *Reconstructing Response to Student Writing* Dan Melzer makes the argument that writing instructors should shift the construct so that peer response and student self assessment are more central than teacher response Presenting the results of a national study of teacher and peer response and student self assessment at institutions of higher education across the United States Melzer analyzes teacher and peer response to over 1 000 pieces of student writing as well as 128 student portfolio reflection essays He draws on his analysis and on a comprehensive review of the literature on response to introduce a constructivist heuristic for response aimed at both composition instructors and instructors across disciplines Melzer argues that teachers and researchers should focus less on teacher response to individual pieces of student writing and more on

engaging in dialogue with student self assessment and peer response focusing on growth and transfer rather than products and grades

Reconstructing Response to Student Writing especially when taken together with Melzer's previous book *Assignments across the Curriculum* provides a comprehensive and large scale view of college writing and responding across the curriculum in the United States

Experimental Writing in Composition Patricia Suzanne Sullivan, 2012-12-15 From the outset experimental writing has been viewed as a means to afford a more creative space for students to express individuality underrepresented social realities and criticisms of dominant socio political discourses and their institutions Yet the recent trend toward multimedia texts has left many composition instructors with little basis from which to assess these new forms and to formulate pedagogies In this original study Patricia Suzanne Sullivan provides a critical history of experimental writing theory and its aesthetic foundations and demonstrates their application to current multimodal writing Sullivan unpacks the work of major scholars in composition and rhetoric and their theories on aesthetics particularly avant gardism She also relates the dialectics that shape these aesthetics and sheds new light on both the positive and negative aspects of experimental writing and its attempts to redefine the writing disciplines Additionally she shows how current debates over the value of multimedia texts echo earlier arguments that pitted experimental writing against traditional models Sullivan further articulates the ways that multimedia is and isn't changing composition pedagogies and provides insights into resolving these tensions
