*Index-catalogue of the Library of the Surgeon General's Office, United States Army (Army Medical Library)* National  
Library of Medicine (U.S.),1959 **StarBriefs 2001** ,2012-12-06 This compilation probably looks like one of the craziest  
things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day  
after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list  
which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct  
sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical  
assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all  
aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists  
quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties  
when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also  
refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or  
confused definitions *Index-catalogue of the Library of the Surgeon-General's Office, United States Army* National Library

Based on a very extensive literature review the book delineates the previous scientific and practical applications of indices as  
benchmarks for single asset classes as stocks commodities German governmental bonds and cash as well as especially for  
multi asset portfolios According to the specific influencing factors of the Eurozone a recommendation of allocating equity  
portfolios with respect to industrial or regional factors is given by an empirical analysis As most common and significant  
benchmark index for the Eurozone the Dow Jones Euro STOXX 50 is analysed according to index effects This serves as  
comparison and consideration of the active anticipations of index membership exchanges and a simple index investment

during short and long term periods Furthermore a correlation weighted equity index established by different TMI industry indices of the Eurozone is calculated which serves as benefit for diversification opportunities of two multidimensionally diversified and systematically allocated multi asset portfolios These portfolios are composed with reference towards the Portfolio Selection Theory by Harry M Markowitz to test its practical relevance and validity during the challenging years from 2001 and 2010
