American Republic 1774-1789 Thomas Patrick Chorlton,2011-04-28 George Washingtons Inauguration in April 1789 marked the beginning of government under the new United States Constitution What few Americans realize is that there had been a fully functioning national government prior to 1789 It was called the Continental Congress and it was in every respect the First American Republic 1774 1789 It began on September 5 1774 when elected delegates from eleven of the American colonies first assembled in Philadelphia Surprisingly that First American Republic is most often dismissed in textbooks and popular history as a failed attempt at self government And yet it was during that fifteen year period that the United States won the war against the strongest empire on Earth established organized government as far west as the Mississippi River built alliances with some of the great powers of Europe and transformed thirteen separate entities into a national confederation When the Continental Congress initially met in 1774 its very first order of business was to elect one of its own members to serve as President He functioned as Head of State much as the Presidents of Germany and Italy do today He signed all official documents received all foreign visitors and represented the emerging nation at official events and through extensive correspondence While Congress retained all other executive legislative and judicial functions the President even presided over its deliberations Eventually a house carriage and servants were provided for the President as a sign of national pride and respect In all fourteen distinguished individuals were chosen by their peers for this unique and awesome responsibility They were the giants of their age men of power wealth and experience who often led their new nation through extremely difficult days largely on the strength of their character For far too long they have been lost to history This is their story *The Shaping of American Liberalism* David F. Ericson,1993-06 A reinterpretation of opposing positions in the debate over the origins of American political tradition the Hartz v s the Bailyn viewpoints *Emerson and the Climates of History* Eduardo Cadava,1997 This book brings together a wide range of materials from history religion philosophy horticulture and meteorology to argue that Emerson articulates his conception of history through the language of the weather Focusing on Emerson s persistent use of climatic and meteorological metaphors the book demonstrates that Emerson s reflections on the weather are inseparable from his preoccupation with the central historical and political issues of his day The author suggests that Emerson s writings may be read as both symptomatic and critical of the governing rhetorics through which Americans of his day thought about the most important contemporary issues and that what has often been seen as Emerson s retreat from the arena of history into the domain of spirit is in fact an effort to re treat or rethink the nature of history in terms of questions of representation What distinguishes this book from the work of other critics who are reassessing Emerson s relation to history is its attempt to think through the way in which the figures of Emerson s rhetoric figures like frost snow the auroras and nature in general which often seem to have nothing to do with either history or

politics are themselves traversed by the conflictual histories of slavery race destiny revolution and the meaning of America It differs that is in proposing a textual model for reading Emerson that measures his engagement with changing historical and political relations in terms of the way he works to revise the language he inherits There can be no reading of Emerson the author suggests that does not trace the movement of his figures and tropes as they become something else as they open onto questions of history

East European Accessions List Library of Congress. Processing Department,1953 Competing Frameworks Anatoli Rapoport,2018-11-01 For citizenship education in the 21st century globalization increasingly presents a new challenge and a new opportunity Since the time when nationalism played a critical role in unifying new nations nationality and citizenship have been virtually synonymous terms As a result the constructed symbiosis of citizenship and national identity has influenced state supported citizenship education in the most profound way School curricula particularly in public schools produced and reinforced the dominant version of citizenship which is national citizenship Schools were expected to

prepare future loyal citizens who would identify themselves with the nation Due to the changing nature and scope of human interactions the traditional model of citizenship education however appears increasingly outdated and deficient to address many contemporary challenges Thus schools have become a locus of a potential conflict of two citizenship discourses the discourse of national citizenship that for a long time has served as the ultimate purpose of public education and the discourse of global citizenship that is forcefully and continuously seeking for a proper place in school curricula despite the lack of curricular heritage The need for an education for citizenship that has a global scope and is guided by critical and emancipatory approaches becomes more evident At the same time the pressure to globalize and internationalize curriculum actively challenges such concepts as patriotism national identity loyalty to the state or national uniqueness of government and democratic development that have been fundamental for citizenship and civic education for decades In this book a group of international scholars present their research about the dynamic development interplay and interconnectedness of two major discourses in citizenship education namely national and global Case studies and ethnographies from China Cyprus Egypt Hong Kong and Singapore Lebanon Liberia the Netherlands Russia and the United States display a multifaceted but yet comprehensive picture of educators attempts to promote social justice global awareness and multiple loyalties The volume will appeal to several constituencies it will be interesting to teachers and teacher educators whose focus of instruction is citizenship education social studies education and global education it will also be interesting to scholars who conduct research in citizenship and global education

Our Onward March Jonathan D. Neu, 2025-03-04 Provides vital new evidence that Union veterans remained stubbornly opposed to the nation's reconciliationist tendencies and unwilling to surrender the causes for which they fought Union soldiers service to the nation did not end in 1865 Instead it persisted well into the twentieth century as hundreds of thousands of veterans joined the Grand Army of the Republic GAR and directed the reform and improvement of their communities through their fraternal membership in thousands of local posts around the country In *Our Onward March* Jonathan D Neu shows how Union veterans of the GAR drew on lessons they learned in the Civil War lessons about broad principles like democracy freedom and loyalty to undertake grassroots civic projects designed to address the rampant social ills and challenging foreign policy issues associated with US modernization Armed this time with sage wisdom and unwavering principles they mobilized again to consummate their wartime victory with reform minded activism on behalf of establishing an even more perfect Union Extending the boundaries of America's post Civil War era Neu investigates the GAR during the Progressive era a period in the organization's history that scholars have overlooked Countering stubborn notions that the GAR was merely a pension advocacy group or an insular bastion of sentimental

nostalgia he reveals instead that the organization reached a turning point in 1890 after which it became an active and decentralized civic association whose members worked to instill a commitment to public life engagement with community issues and pride in the democracy they had defended as young men Anchored by illuminating new source material including post minute books and fraternal records Our Onward March places aging GAR members squarely among the diverse constellation of turn of the century social reformers using their memory of the Civil War to promote robust veteran led civic engagement By situating Union veterans in this context we see a more accurate portrait of the GAR post in American culture as a local center of progressive activism
