The GPRS Manager is designed to help you set up a wireless connection to the Internet. Your Motorola GPRS phone can act as a modem for Internet connections from your personal computer, so you can use e-mail, transfer files, browse the Web, and chat using wireless connections.

These connections utilize [GPRS](#) (General Packet Radio Services), a wireless communications service for transmitting data over GSM digital cellular networks. GPRS provides continuous connections using packet-based, high-speed transmissions.

***This guide provides instructions for:***

- 1** Installing the software.
- 2** Using the GPRS Connection Wizard to create a Connection profile.
- 3** Using the GPRS Manager to open and close a wireless connection.
